VELUX flexible sun tunnel TCF, 14"

Glazing 93E

The VELUX sun tunnel for flat roof with flexible tunnel TCF is the perfect choice for VELUX sun tunnel installations when rigid tunnels cannot be used – i.e. when there is a beam or other obstacle between the roof and the ceiling. Recommended for lengths 0.2 m and 0.9 m for flat roofs.

- Experience more daylight and stunning light effects from the stylish glass diffuser with EdgeGlow.
- Flexible fibreglass tunnel can be installed even when there are obstacles between the roof and ceiling.
- Reflective inner coating increases the amount of natural light that enters the room.
- Strong, maintenance-free protective dome can withstand extreme weather conditions.
- White ceiling ring seamlessly integrates with your white ceilings.
- Removable inner glass can be easily cleaned to keep your sun tunnel bright and beautiful.
- Comes with everything you need for a safe and watertight installation of your new VELUX sun tunnel.
