

VELUX Modular Skylights

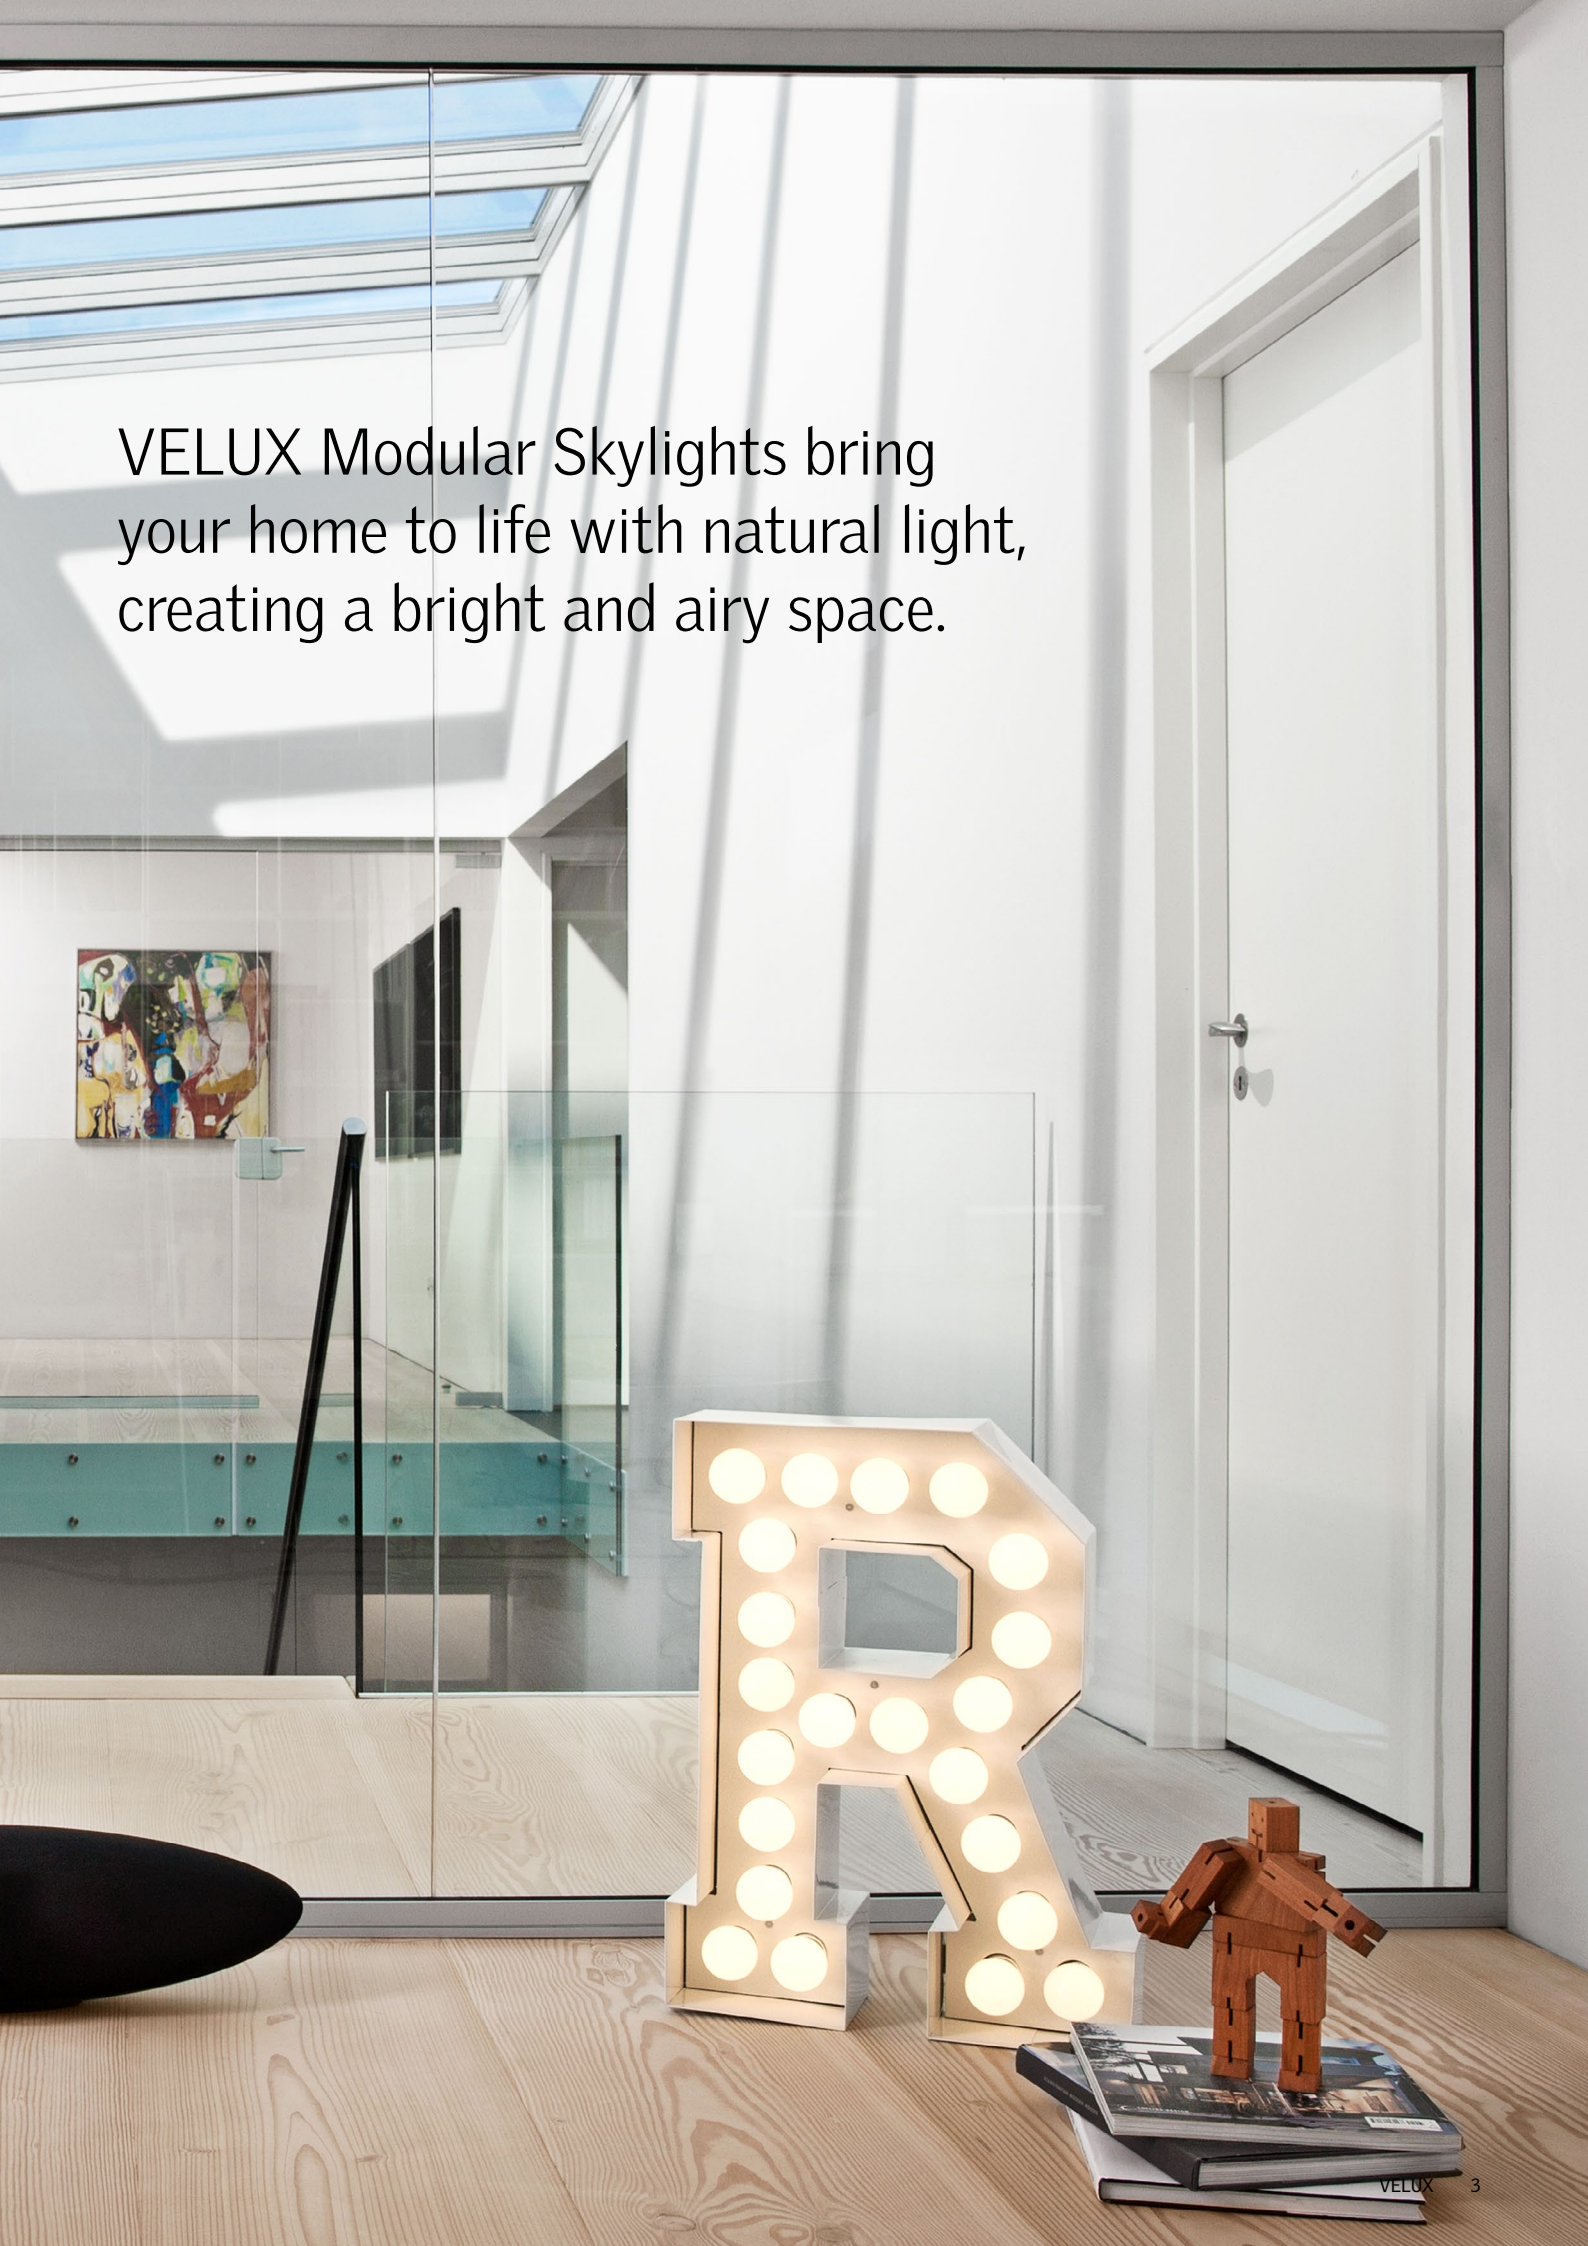

An innovative way to transform your home with daylight

Product Brochure with Price list

1st June 2026 – ROI Version

velux.ie

VELUX Modular Skylights bring your home to life with natural light, creating a bright and airy space.

VELUX Modular Skylights

VELUX Modular Skylights are the perfect way to open up large rooms in your home and create a light, bright and spacious environment. VELUX Modular Skylights combine elegant lines and intelligent design with exceptional energy efficiency.

Robust and energy efficient

All VELUX Modular Skylights are constructed from an advanced composite material that makes them very strong and highly energy-efficient. The entire installation is designed to withstand extreme weather conditions, with a life expectancy stretching far into the future and a 10 Year Product Guarantee.

VERDENSATLAS

Light up the rooms in your home

The living room and kitchen are at the heart of the home. It's where we relax together, perhaps with a good book, watch TV, or play games. The range of activities that we enjoy in our homes means the lighting must meet everyone's needs, whilst also making the room look attractive morning, noon and night.

With VELUX Modular Skylights, you can supplement the limited light from your room's vertical windows with light that shines into the centre of your room. The light from a skylight enters directly from above – a much stronger source of illumination than light coming from the side through windows in the walls. No matter whether the sun is shining or the sky is blanketed in clouds, VELUX Modular Skylights guarantees plenty of natural light throughout the day.

The solution
If you want to transform your home with the effects of natural light, we recommend VELUX Modular Skylights with multiple modules in a row. This solution can be opened automatically for ventilation and the addition of electrically operated roller blinds offers greater light and energy control.

VELUX INTEGRA® control pad with touch screen and swipe function uses icons for easy and intuitive control.

The ultimate skylight solution

Slim profiles create an elegant design, while curved surfaces minimise shadowing effect.

The hidden actuators open and close the venting units according to the remote controlled settings. Total integration ensures a discrete result.

Internal roller blinds use thin lines to create a free floating design. Blinds control daylight and reduce heat.

VELUX Modular Skylights allow you to create large, daylit areas with direct access to open sky and a wonderful sense of space all around. Each skylight installation can hold up to 6 modules in a longlight solution.

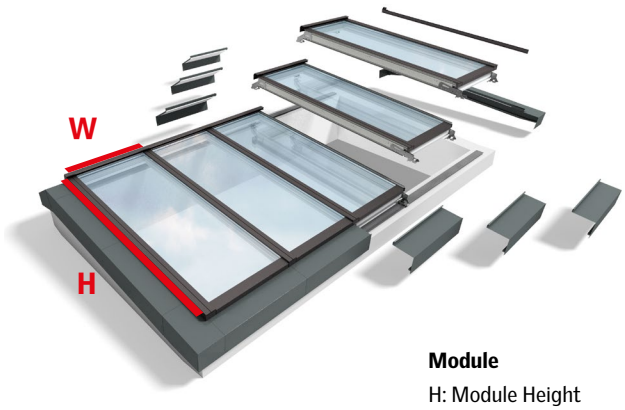

Modules are available as both fixed and venting units, giving you the opportunity to combine natural lighting with natural ventilation. Ventilation is controlled by the VELUX INTEGRA® intelligent system and offers full automation with scheduled operation several times a day.

Modules can also be fitted with specially designed roller blinds to control daylight and reduce solar heating.

Installation and technical data

Modular concept

Module

H: Module Height
W: Module Width

The VELUX Modular Skylight system is based on a modular concept. All components are prefabricated to ensure consistent quality throughout the build, fast and easy installation and a perfect fit every time.

Types of modules

Fixed skylight module

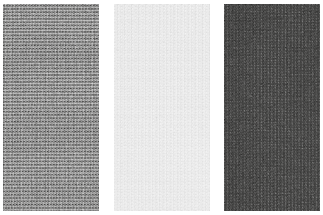

Venting skylight module

Motorized comfort ventilation
(Opening up to 260 mm)

Due to building legislation, solutions containing venting modules must NOT be installed below 2.5 meter above floor level.

Roller blinds

Grey White Black

Roller blind

The internal roller blind offers protection against heat and glare and is available in three stylish colours. The fabric is colourfast and durable. Please note that roller blinds must be ordered separately.

Types of pane

Double-glazed unit
U_w = 1.4 W/(m²K)

Triple-glazed unit
U_w = 0.89 W/(m²K)

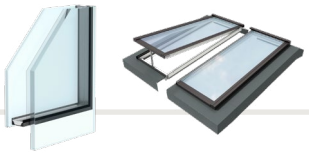

Guarantee

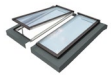

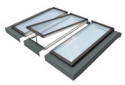

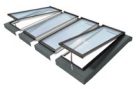

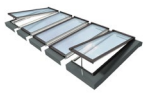

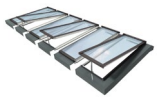

When you invest in VELUX Modular Skylights, we want you to feel confident about your choice. That is why we support all VELUX Modular Skylights with a 10-year guarantee. Blinds, actuators and other electrical components that are a part of the modular system come with a 3-year guarantee. All warranty is subject to correct installation and usage.

For terms and conditions, please visit our website.

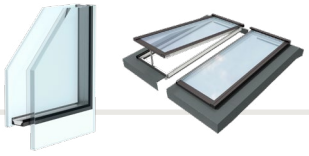

Sizes and price list* (excludes VAT)

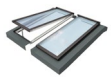

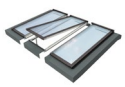

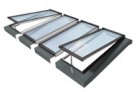

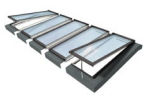

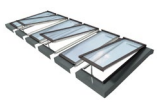

Venting modules double-glazed – 800 wide U-value 1.4 W/m²K

Blind Accessories

The blind accessories are not included in all packages
– these are an extra that require to be purchased if adding blinds to fixed modules

KLC 410 UK	KLR 200 WW
INTEGRA Control Unit for up to 4 blinds: **€303**	Integra Remote Control: **€378**
	

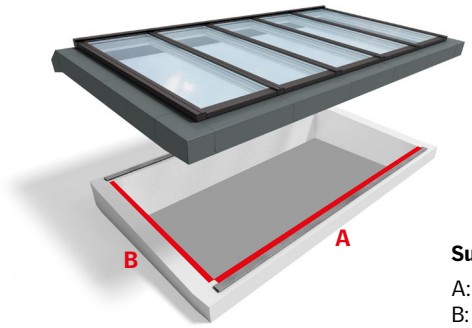

*Delivery time is 6 weeks from receipt of orders placed before 2pm.

Accessories for the venting packages

Included in all venting packages.

KLC 410 UK	KLR 200 WW	KLA 200
Power supply and control unit for one venting module and/or up to four roller blinds RMM.	Integra Remote Control	Rain sensor
Uses 230 V power supply Power consumption max. 250 W	Handheld or wall-mounted Battery-powered	Connected to KLC 410 (1 per KLC 410) Power consumption max. 1 W
		

Sub-construction

Sub-construction

A: Opening Width
B: Opening Length

Download and read our installation guide and sub-construction document at:
velux.ie/domesticmodularskylights

Sub-construction dimensions depend on the scope of the project

VELUX Modular Skylights such as Longlights are installed on a sub-construction made out of wood, steel or concrete. The sub-construction does not form part of the VELUX skylight solution. The individual details of each building's roof structure and load tolerances (statics) will vary from project to project.

For installation purposes, it is essential that the sub-construction should meet precise specifications in terms of dimensions, load-bearing capacity etc. VELUX product sheets and installation instructions for Longlights contain detailed descriptions of each product and the relevant installation process.

Remember to consult your local installer before choosing your solution, or contact the VELUX Modular Skylights Support Team for further information and project specific details.
