VELUX flexible sun tunnel TWF (tiles), 14"

Glazing 93E

The VELUX sun tunnel with flexible tunnel for pitched roofs TWF is the perfect choice for sun tunnel installations when rigid tunnels cannot be used – i.e. when there is a beam or other obstacle between the roof and the ceiling. Recommended for lengths between 0.4 m and 2 m.

- Experience more daylight and stunning light effects from the stylish glass diffuser with EdgeGlow.
- Flexible fibreglass tunnel can be installed even when there are obstacles between the roof and ceiling.
- The elegant, maintenance-free exterior glass module blends with your roof for a streamlined look.
- Reflective inner coating increases the amount of natural light that enters the room.
- White ceiling ring seamlessly integrates with your white ceilings.
- Removable inner glass can be easily cleaned to keep your sun tunnel bright and beautiful.
- Comes with everything you need for a safe and watertight installation of your new VELUX sun tunnel.
