Application guidance

The window can be installed in roof pitches between 15° and 55° (75°) to the horizontal.

VELUX 2in1 manual roof window GPLS opens outwards for an unobstructed, panoramic view. It consists of two windows, one openable, bottom-operated and one fixed, in one frame. This provides extra daylight and an extensive view while offering all the benefits of our bottom-operated windows. To benefit optimally from the wide view, we recommend an installation height that allows for a clear sight line to the outside from both a standing and seated position.
