# VELUX bottom-hung vertical window element VFE

15°-55°

Extend your views with an openable, vertical window element, which is operated with a handle on the top sash. The window element fills the vertical space between the floor and the bottom of the roof window to provide more expansive views with more natural daylight and fresh air. Available in lacquered or white-painted pine wood to perfectly match your other VELUX roof windows.

- Experience more daylight, extended views and more fresh air by adding an openable vertical window element.
- Enjoy the flow of fresh air by tilting the vertical window element inwards.
- Inwards tilting sash to maximum 115 mm opening provides safety and peace of mind.
- It's possible to clean the outside of the window element by tilting it inwards up to 115 mm.
- A seamless look is made possible by the slim connection to the roof window.

Application guidance

The vertical window element is always fixed to the bottom frame of a sloped roof window. The installation angle of the sloped window when combined with a vertical element is limited to 15-55°. The installation angle within this range is determined by the sloped roof window type and the flashing type with which it is installed.

The vertical window element VFE is installed vertically directly below a VELUX roof window. As it stretches nearly to the floor, it provides more daylight and an enhanced view when standing and when seated. The vertical window element VFE opens/tilts inwards and can be secured in ventilation position.

Available sizes and daylight area

The size overview shows the availability across the different glazing variants. Please note that the individual glazing variant may not be available in all the sizes shown.

	780	942	1140	1340
601	VFE MK31 (0.23) []	VFE PK31 (0.29) []	VFE SK31 (0.36) []	VFE UK31 (0.44) []
955	VFE MK35 (0.44) []	VFE PK35 (0.56) []	VFE SK35 (0.70) []	VFE UK35 (0.85) []

Flashings and installation products

Flashings
Install the VELUX roof window in virtually any roofing material by using genuine VELUX flashing solutions. Our flashings are designed specifically for the exact size and shape of the roof windows to create perfect, watertight fit. Flashings can also be used to combine multiple roof windows.

Installation products
Ensure a proper installation and an air- and watertight connection between the window and roof with VELUX installation products. All installation products are designed to perfectly fit the roof window for a reliable and durable result.

Blinds, awnings and shutters

Complete the VELUX roof window installation with roller shutters and awning blinds for heat protection and interior blinds for light dimming, blackout and insect protection. Choose from a wide range of manually operated or remote-controlled products that are made to fit the particular window type and size. Please contact your local VELUX sales company for more details about compatibility.
