Transforming spaces into favourite places

We all look for the perfect place where we can relax, recharge and feel content – or even be more productive. Often, without us noticing, it is a place filled with daylight and fresh air.

For over 80 years, the VELUX Group has helped people transform spaces using daylight and fresh air through the roof. By creating brighter, healthier, more sustainable places to live, work, learn and play, we enable a better everyday life for people around the world.

Our award-winning roof windows can fit any roof – flat, pitched, old or new and can be accessorised with VELUX blinds and shutters. You can even add more space to your home with a VELUX Roof balcony or upgrade your roof windows to VELUX ACTIVE with NETATMO – our intelligent home control solution.

VELUX roof windows are built to last. We take pride in our craft and high-quality products. But what you might not see is the work we're doing to reduce our environmental impact and the ways we support our customers in their efforts to do the same. We have set targets to reduce our carbon emissions in line with the Paris Agreement's most ambitious emissions reduction pathway. In addition, we aim to remove all plastic from our packaging and ensure it's 100% recyclable, making waste management simpler. In other words, there are several reasons to choose a VELUX roof window.

Our contribution to a more sustainable building sector

With the building industry accounting for over a third of CO_2 emissions, the need for change is urgent. We aim to lead the way and show how rethinking buildings can accelerate that transformation. Our initiatives include:

- Reducing emissions from our own operations by 100% (Scope 1 & 2) by 2030.

- By 2030, 50% reduction of CO_2 from our value chain (Scope 3) compared with baseline year 2020.

- All production sites to send zero production waste to landfill by 2030.

- Reduce and remove the equivalent of our historical CO_2 emissions through forest projects.

- Transition to single-material, paper-based packaging that can be disposed of in one waste stream for recycling.

Although it sounds simple, transitioning from plastic to paper-based packaging presents many challenges. The process for our main roof windows has taken over two years and involved design professionals, engineers and production companies.

Extensive testing showed that paper-based materials with honeycomb panels could withstand stacking pressure, knocks and blows, as well as humidity and temperature changes. In Europe, our new paper-based packaging has saved more than 900 tonnes of EPS/plastic in 2023 compared to 2021.

Our goal for 2030 is to halve CO_2 emissions from our product production, the materials they use, and across our entire value chain. This means that a VELUX roof window in 2030 will have a significantly reduced carbon footprint compared to today. When you buy a VELUX solution, you are part of this journey.

Why VELUX®

All over the world, VELUX roof windows contribute to healthy indoor environments by letting in fresh air and daylight. Here are five other good reasons why you should consider original VELUX products.

80 years of innovation

When the first VELUX roof window transformed a dark attic into a liveable space, it was a revelation. That was 80 years ago but our passion for daylight, fresh air and better living environments continues to this day and can be seen through our constant innovation and award-winning design.

Extensively tested

VELUX products are designed to meet the highest quality standards and undergo thorough testing. For example, all roof windows are tested to withstand a year's rainfall in just 15 minutes. They are also opened and closed 25,000 times – the equivalent of opening and closing the roof window every day for 68 years!

10-year guarantee

We strive to ensure the quality of all VELUX products and accessories live up to our customers' exacting standards. However, in the rare event that you experience a problem with your VELUX roof window, we offer a 10-year guarantee on all core products. We offer up to a 5-year guarantee on blinds, shutters and electrical products.
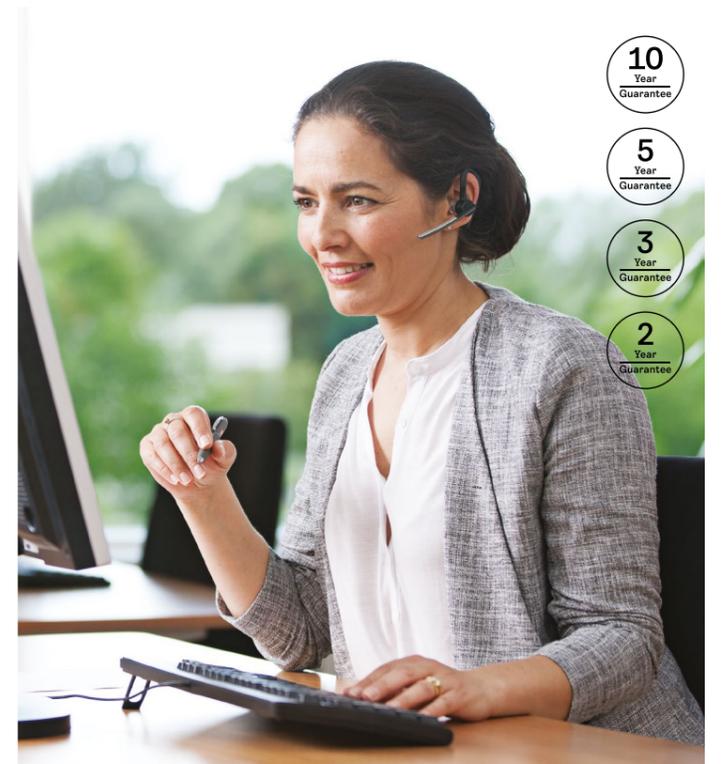

Here for you

When you need support, our team is never more than a phone call away. The expert team are trained to give you as much in-depth assistance on planning, installation and aftercare as you need. Call us on 01592 778 225.
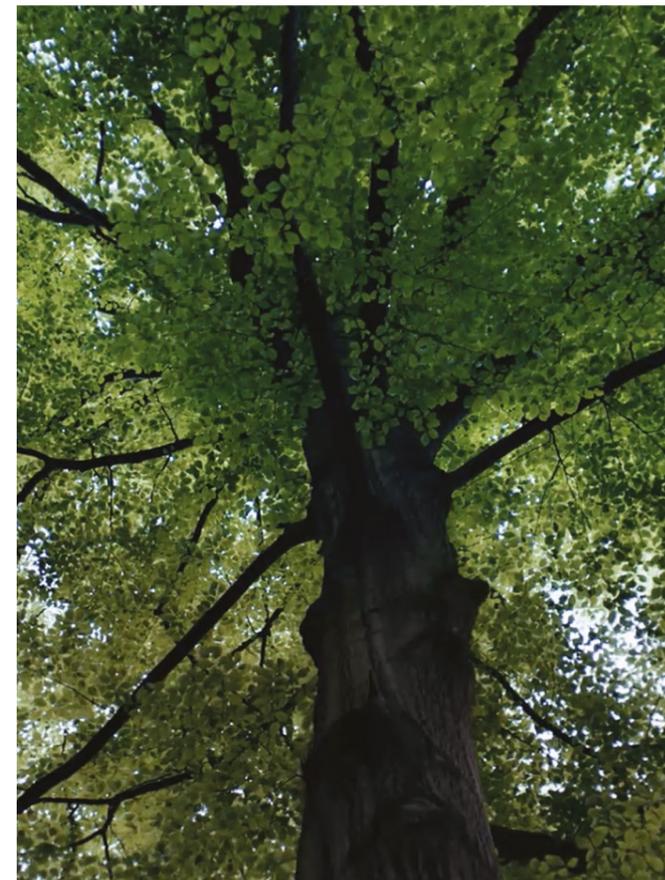

Focused on our environmental impact

We are confident that VELUX solutions will last for many years with occasional maintenance and cleaning. Furthermore, we are striving to send zero production waste to landfill, source responsibly and continually find ways to reduce our environmental impact.

More flexible and intuitive than ever before
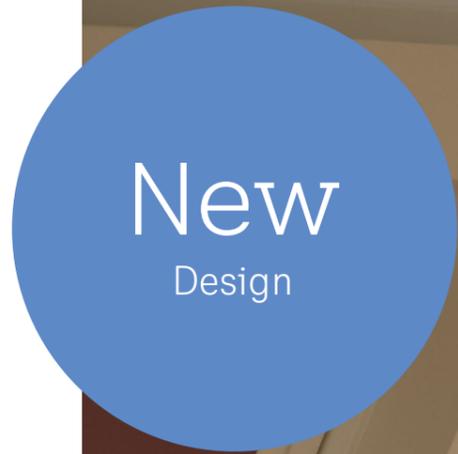

The new design of our solar and electric blinds range allows you to easily operate the blind either remotely or manually via a new slider, positioned directly on the product.

The new design offers a number of product benefits:

Optimised design
The slimmer profile along the bottom of the blind integrates seamlessly with the roof window, providing an unobstructed view and maximum daylight.

New, quieter motor
Regardless of operation, the motor runs almost without sound.

A solution to suit everyone
Available in a wide range of colours and fabrics including blackout, energy pleated and translucent.

Even longer guarantee
Now comes with an extended guarantee of 5 years.

New
Design

Unique design
Available in a wide range of colours.

Slimmer profile
Lets in maximum daylight.

Multiple operation
Operate remotely or manually via the slider.

Focus
Solar

Solar powered - illuminate a sustainable tomorrow

Our solar powered products use daylight as a power source – eliminating the need for any wiring.

The long-lasting solar battery is powered by an integrated solar cell that is placed on the exterior of the roof window.

Powered by daylight

By utlising the power of daylight, solar roof windows offer a solution that promotes the use of renewable energy.

Reliable even when it's cloudy

With an integrated solar cell on the exterior, the roof window captures daylight throughout the day, even when it's cloudy. It's as rigorously tested as our electric roof windows to ensure reliable performance for years to come.

Easy control for everyone

Upgrade your solar roof window with a switch or App Control from the Intelligent home control range. Control your roof windows effortlessly and adjust natural light and ventilation easily to your preferences.

The bright side of solar innovation

Welcome to a new level of comfort and convenience with the range of solar roof windows, blinds and shutters. Experience the ease of airing out your home and adjusting natural light and temperature with the simple touch of a switch or your smartphone.

Improved comfort and well-being

Invite fresh air and daylight in, to create a healthy home that's aired out more often, for a comfortable and energy-efficient indoor climate.

Automatic protection from bad weather

The rain sensor gives you total peace of mind, as it will close the roof windows automatically in the event of rain, protecting your home from water damage whilst it's ventilating.

Save valuable energy

Whatever the time of year, you can ventilate your home efficiently with minimal energy loss.

Blinds and exterior shutters can help save energy and improve indoor comfort throughout the year. In winter, double pleated interior blinds keep the room cosy, while in summer, anti-heat blinds or shutters effectively reduce overheating.

Always in control

Solar products provide enhanced control of your roof windows and accessories from the palm of your hand, either at home or on the go. Be in full control – all the time.

Extended 10-year guarantee on solar and electric roof windows

The standard guarantee for sloping solar and electric roof windows has been increased from 3 to 5 years. You can extend this period by an additional 5 years by simply registering your VELUX roof window.

5 Year Guarantee   **10** Year Guarantee

Standard 5-year guarantee

All solar and electric roof windows now come with an impressive 5-year standard guarantee to support the durability and reliability of our products.

Exclusive 5-year extended guarantee*

Enjoy an additional 5-year guarantee and extend your total coverage to 10 years by registering your products at **velux.co.uk/extendedwarranty**

*Includes white maintenance-free GGU/GPU and white painted GGL/GGLS.

Focus

Free VELUX App Control now available with all solar and electric roof windows

When you purchase any of our solar and electric roof windows, you can claim a free VELUX App Control gateway.

This gateway is your key to unlocking additional benefits of your solar and electric roof windows, providing complete control from your smartphone.

How to order?

To claim your free VELUX App Control gateway, download the VELUX ACTIVE app from the App Store or Google Play Store on your smartphone. Follow the in-app process to order the VELUX App Control gateway. Visit **velux.co.uk/freeapp** to learn more.

Different finishes for different needs

Choose your preferred finish

Our roof windows come in different finishes to match your needs and preferences on maintenance, durability and look.

White maintenance-free
The most durable and robust finish that is completely maintenance-free.

· **Moisture-resistant:**
The ideal choice for all room types no matter the level of moisture or condensation.

· **Wipeable surface:**
The seamless corners and robust material make it quick and easy-to-clean.

· **Outstanding quality:**
A wooden core encased in a hard-wearing, waterproof white polyurethane mould.

White painted
High-quality natural pine treated with a water-based white paint for a discreet wood grain look.

· **Maintenance:**
We recommend that VELUX white painted roof windows should be sanded and repainted approximately every 7 years.

· **Look and design:**
A white painted wood for those looking for a simple bright white finish.

· **Durability:**
White, water-based lacquer protects the wood frame from everyday levels of dirt and moisture.

Designed to complement heritage and conservation

Sensitively enhancing the future value of historical buildings

The Heritage conservation roof window is designed to harmonise with the aesthetics of historical façades. Slim, elegant and sitting flush to the roofing materials, it blends beautifully into historical roofs.

Drawing inspiration from the past, present, and future, it enhances modern indoor living and transforms spaces into favourite places.

Designed for heritage
Co-created with conservation specialists and specifically designed to be in keeping with heritage aesthetics of traditional buildings and properties located in conservation areas.

· Black, slim profiles create a traditional cast-iron look.
· Flush to the slates, blending beautifully into the roof.
· Glass-to-edge design for a clean, aesthetic appearance.
· **NEW** Pro flashing set for profiled roofing materials up to 90mm, ensuring seamless and flush integration into the roof.

Anti-heat blackout shutters, Anti-heat blinds and interior blinds for all year round comfort

VELUX roof windows fill your home with daylight and fresh air. Having the right weather and sun protection also ensures a pleasant indoor climate and helps save energy.

Focus
Heat protection

Exterior weather and heat protection

Choose Anti-heat blinds and shutters to create a shield between the sun's rays and the roof windows to prevent the direct sunlight from entering the home. Rain noise is also significantly reduced.

More information from page 106.

Tip

Anti-heat blackout shutter + Blackout energy pleated blind

Up to 5.0°C* cooler in summer + heat energy savings in winter.

Interior light control

Choose interior blinds to complement a room, soften incoming light or provide privacy or blackout to ensure a good night's sleep or a daytime nap. In the colder months, they will help to keep the room warm and create a cosy atmosphere.

More information from page 113.

Tip

**Add insect screens to enjoy fresh air without unwanted visitors**

More information from page 127.

* Data from a simulated south-facing room with two VELUX GGU 70 roof windows in size MK06 (78.0 x 117.8cm), July – August 2023, recorded in London. Based on a study by VELUX 2023 on the effects of accessories in summer.

Roof window selection guide

Natural light is essential to your well-being. Use the 7-step guide to ensure you get the right solution for your project.
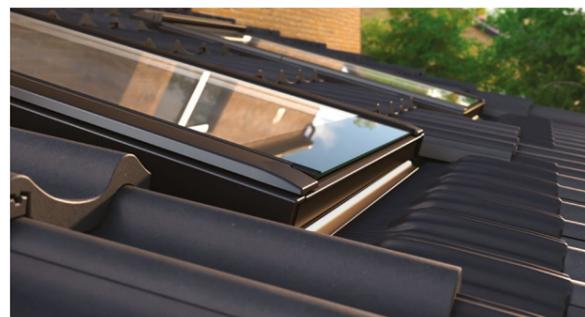

1. Identify the roof pitch

Regardless of the roof pitch there is a VELUX solution. VELUX roof windows can be installed in all roof types:

Flat
0–15°

Low pitch
10–20°

Pitched
15–90°

2. Calculate the right amount of daylight

The size and number of roof windows are fundamental to how the space will look and feel.

· We recommend the glazed area is approximately 20% of the floor area.
· This can be achieved with easy-to-install VELUX roof window combinations.
· Roof windows bring in twice as much daylight as façade windows.

3. Choose the operation

For ultimate convenience and comfort, we recommend VELUX solar roof windows.

VELUX recommends Solar operation

· Easily installed, no wiring required.
· Operates even in cloudy weather.
· Integrated rain sensors close the roof window in the event of rain.

Read more on page 10.

4. Choose the interior finish

VELUX recommends White maintenance-free

For the most durable and robust result, choose a white maintenance-free finish.

· Moisture resistant, ideal for all room types.
· Wipeable surface with seamless corners.
· Wooden core encased in a hard-wearing, waterproof white polyurethane mould.

Read more on page 15.

5. Choose the glazing
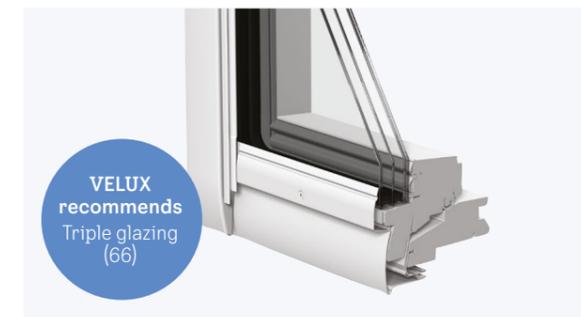

VELUX recommends Triple glazing (66)

To achieve the best energy efficiency VELUX recommends triple glazing.

· Minimises the feeling of cold.
· Extra noise reduction to diminish outside street noise.
· Easy-to-clean and anti-dew coatings provide a clearer view.

Read more on page 170.

6. Flashing and installation

VELUX recommends Recessed flashing

VELUX flashings provide a durable 100% watertight and weather-proof seal.

· Most VELUX flashings come with installation products included as standard to suit a wide range of roofing materials.
· VELUX recommends recessed flashings to provide a sleek and streamlined finish.

Read more on page 83.

7. Choose blinds and shutters

VELUX recommends Anti-heat blinds and shutters

For better indoor comfort VELUX recommends roof windows with blinds and exterior heat protection.

· Exterior heat protection adds insulation, protection from heat and the elements, enhanced rain noise reduction and daylight control.
· Interior blinds provide blackout or light dimming and decoration.
· All solutions provide a perfect fit, long-lasting performance and are easy to install.

Read more on page 103.

Intelligent home control

Unlock the full potential of your solar or electric roof windows, blinds and shutters with VELUX Intelligent home control – the range of smart control solutions that empower you to take control of your indoor comfort with ease, while enjoying the full benefits of daylight and fresh air.

Easy control options for your VELUX solar and electric products

Our controls make it easy for you to adjust your roof windows, blinds and shutters with the simple touch of a switch or your smartphone. Say goodbye to manual adjustments and experience the easy way of managing your roof windows, blinds and shutters.

Basic Wall Switch

VELUX Wall Switch

The Wall Switch lets you conveniently open, stop and close VELUX solar and electric products.

· Allows control of one product per switch.

Included with the purchase of any VELUX solar or electric product

Multiple product switch

VELUX Touch

VELUX Touch makes it easy to feel perfectly comfortable at home by ensuring every solar or electric roof window, blind and shutter is always within easy reach. Let in a cool breeze when you need a breath of fresh air, shield your home from the midday sun or close the blinds for a movie night – all with a single master switch.

· Control multiple VELUX solar and electric products in a home.
· 15-minute ventilation timer.

How does VELUX ACTIVE work?

VELUX ACTIVE with NETATMO continuously monitors the temperature, humidity and CO_2 levels in your home, automatically opening or closing roof windows, blinds and shutters to create a healthier indoor climate for you and your family.
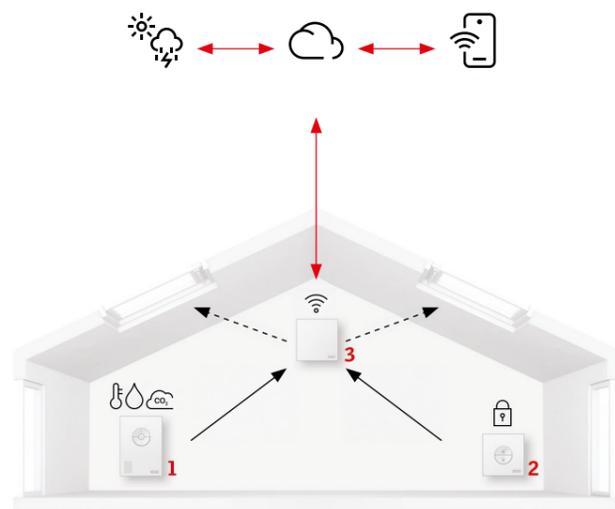

The three elements of VELUX ACTIVE

1. **Indoor climate sensor** – monitors the humidity and temperature levels in the room and transmits the data to the gateway.

2. **The departure switch** – closes all the windows with a single push of a button.

3. **The gateway** – the 'heart' of the VELUX ACTIVE system connects the electrical products to your Wi-Fi router (internet), the indoor climate sensor and the departure switch.

Compatibility

· VELUX electric top-hung roof window is only compatible with manual or solar-powered blinds.
· Not compatible with twin flashings and insulated replacement flashings.

Blinds and shutters

· Consider interior blinds for light control, and exterior anti-heat blinds or shutters for added heat protection.

Intelligent home control

📶 Combine your VELUX electric products with our intelligent home control solutions for multiple operation, scheduling and automation.

📱 Free App Control included. Read more at velux.co.uk/freeapp

Transform with daylight

· A single roof window is ideal for small rooms. For bigger rooms, we recommend roof window combinations.

Transform with daylight

· A single roof window is ideal for small rooms. For bigger rooms, we recommend roof window combinations.

Manual top-hung

Top-hung roof window: GPU and GPL

Use the elegant handle at the bottom to open the roof window outwards, lean out and enjoy an undisturbed panoramic view of the outdoors with the VELUX top-hung roof window. The outward-opening roof window creates a balcony-like feel when opened and is our recommended choice for loft conversions. It also features a ventilation bar, allowing you to air out your space while the roof window remains closed.
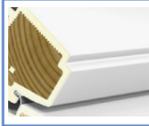

· Easy opening for a pleasing panoramic view.
· Ventilation filter protects against dust and insects.
· Easy to rotate the roof window and clean the outer glass.
· Easily add blinds by simply clicking them into the pre-fitted mounting brackets.

Glass to edge

Manual centre-pivot for low pitch roofs

Made for homes with low pitches (10°-20°): GBL

Perfect for bringing daylight and fresh air into single-storey extensions, the Low pitch roof window is the best solution for roofs with a pitch between 10°-20°. The product is designed to be fully watertight at a low pitch and features glass-to-edge technology, ensuring a seamless and aesthetic installation.

- Tested in one of northern Europe's largest wind tunnels for wind and water resistance.
- Fast and simple installation.
- Compatible with VELUX interior blinds and exterior anti-heat shutters.
- Suitable for interlocking profiled tiles ranging from 15mm to 120mm, approved for roof pitches between 10° and 20°.

Heritage conservation roof window

Ideal for heritage, conservation and historical properties: GCL

The Heritage conservation roof window is designed to be in keeping with heritage aesthetics of historical buildings. Slim, elegant and sitting flush to the slates, it blends beautifully into the roofing materials. Thoughtfully co-created with Architects and Conservation Officers, it enhances modern living, while maintaining the building's original character.

· Sleek, slim-fit profile for an appearance in line with historic heritage.
· Authentic top-hung design.
· Crafted glass-to-edge technology for a clean appearance.
· Central glazing bar for period authenticity.
· Flashing set for slate, plain and profiled tile roofs, for effortless installation (no need for manual lead flashing).
· Original hand-winder for natural ventilation.

Conservation roof window

The contemporary choice for traditional properties:
GGL H and GPL H

The Conservation roof window is the perfect combination of the past and present. The roof window's black exterior profile and glazing bar blend seamlessly into the roof to match the building's original characteristics.

Its additional features offer you the same convenience as a standard VELUX roof window.

· Traditional external appearance.
· Centre-pivot option for easy operation.
· Top-hung option available for uninterrupted panoramic views.
· Top control bar with integrated ventilation.
· Fresh air even when the window is closed.
· Pivot function for easy cleaning.

Get the view

Combine your roof windows

Add additional roof windows and instantly improve the feeling of space and openness in your home.

It is easy to combine multiple roof windows to expand your view and bring more daylight and fresh air into your home. Select from our recommended solutions or create your own from virtually any combination of VELUX roof windows.

· Create a solution that meets your specific needs.
· Enjoy enhanced views and more daylight.
· Give your home a feeling of spaciousness.

Integrated side-by-side and triple

Add extra wow factor to your room with our side-by-side and triple combinations. These solutions feature adjacent roof windows that give your room even more daylight so you can enjoy a panoramic view to the world outside.

Quattro

This four-window solution creates a stunning centrepiece around your outdoor view and dramatically increases the amount of daylight and sense of spaciousness in your room.

Duo

Ideal for narrow spaces, such as above stairs, this solution maximises daylight in often dark and overlooked spaces. Enhance the feeling of spaciousness and create a beautiful architectural feature.
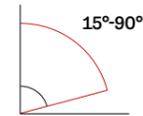

Integrated side-by-side

An integrated solution with no intrusive rafter

Where there is room for one roof window, there is often room for two. The VELUX Integrated side-by-side solution features adjacent roof windows that create a stunning architectural feature. Flood your room with light and enjoy a feeling of spaciousness.

By trimming the rafter, you reduce the amount of protruding wall between the roof windows to ensure a more integrated roof window with an elegant end result.

The all-in-one installation package contains everything you need for hassle-free installation, including a flat click-on cover plate for the frame gap between the roof windows.
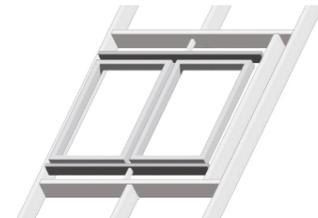

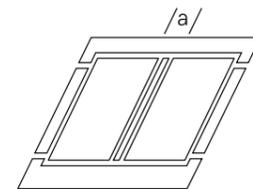

Roof pitch

Intelligent home control

Combine your VELUX solar and electric products with our intelligent home control solutions for multiple operation, scheduling and automation.

Read more on page 24.

Flashing

· For further flashing information read more on page 83.

Transform with daylight

· The Duo combination is recommended for narrow spaces like staircases.

Duo

Ideal for narrow rooms

For narrow spaces, such as above stairs, a Duo combination of two VELUX roof windows draws more daylight deep into the room. By adding an additional roof window, you can enhance the feeling of spaciousness, maximise natural light and create an architectural feature in otherwise dark and overlooked spaces.
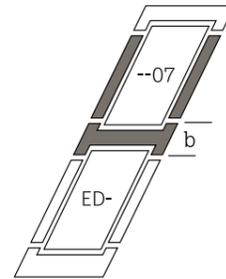

· Enhanced views and more daylight.
· Increases the feeling of spaciousness.

Sloping and fixed

A sleek solution to increase your view: GIU and GIL

Extend your views with a fixed roof window element that blends seamlessly with the roof window. The window element fills the sloping space between the floor and the bottom of the roof window to provide more expansive views and more natural daylight.

This is the ideal choice if you want to maximise your roof window area.

· Slim connection.
· Daylight extension.
· Suitable for all rooms.

Sloping and vertical

Vertical façade extension for increased view: VIU and VFE

Extend your view with a fixed or openable, vertical roof window element. The additional window element fills the vertical space between the floor and the bottom of the roof window to provide a more expansive view and more natural daylight.

This is the ideal choice if you have a one and a half-storey home and want to maximise your roof window area.

· Extra façade view and daylight.
· Fixed or opening roof window elements.

Roof balcony

From roof window to a balcony experience: GDL

Transform your home and welcome in the outdoors by simply opening your VELUX Roof balcony. The innovative balcony opens in seconds to give your home more space, daylight and fresh air. Consisting of a top-hung roof window and a bottom section that unfolds into a glazed balcony with elegant side banister railings, it's a balcony experience like no other.

· Enjoy extra space in the room.
· Top element opens 45° outwards giving you extra headroom and beautiful panoramic views.
· Transforms from a roof window into a balcony in seconds.
· Side banister railings for extra safety.
· Energy-efficient triple glazing is featured as standard.
· Double package consists of one roof balcony and one top-hung upper and fixed lower element.

2in1 solar centre-pivot

Two roof windows in one frame: GGLS

The solar-powered 2in1 offers you the added convenience of remote control with the benefit of more daylight. Operate the openable sash with the wireless Wall Switch for ultimate convenience. The roof window's single frame design and solar-powered motor ensure an easy installation with no additional wiring needed.

- One frame for easy installation.
- Automatic rain sensor that closes the roof window when it rains.
- Battery charges even in cloudy weather.
- Slim profiles for more daylight and a better view.
- One openable and one fixed sash.
- Symmetric and asymmetric sizes for your design preference.
- Basic Wall Switch included, see page 24.

2in1 manual centre-pivot

Two roof windows in one frame: GGLS

The 2in1 centre-pivot roof window combines one, openable sash with one fixed sash for more daylight and a dazzling view.
Its slim profile increases the amount of light entering the room.
What's more, its single frame makes the installation of the 2in1 as simple as fitting just one VELUX roof window and is more affordable than two single roof windows of comparable size.

· Slim profile for more daylight and a better view.
· One frame for easy installation.
· Symmetric and asymmetric sizes for your design preference.
· Most affordable way to double your daylight.

Out-of-reach

· Consider the 3in1 solar roof window for remote-controlled operation of your roof windows if placed out-of-reach.

Read more on page 70.

Transform with 3in1

· 3in1 roof windows are the easiest way to achieve the right amount of daylight for impactful transformations in medium or large-sized rooms.
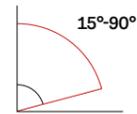

3in1 manual centre-pivot

Three roof windows in one frame: GGLS

With the 3in1 centre-pivot roof window, you can create a stunning focal point in any room. Its slim-frame profile maximises the amount of daylight entering the room. What's more, the single frame makes installation of the three roof windows as simple as fitting just one VELUX roof window.

· Provides the feeling of more space.
· One frame with multiple sashes for easy installation.
· More cost-effective than purchasing three single roof windows of the same size.
· Compatible with VELUX Heat protection products and blinds.
· Two openable and one fixed sash.

Mini dormer

Extra space in a compact solution

The clever Mini dormer design places VELUX roof windows at a steeper angle in the roof compared to the roof pitch. This allows much more daylight to enter than with a single traditional dormer window. The Mini dormer comes in various options for 1, 2 or 3 roof windows side by side and can be installed quickly and easily from the inside.

- The compact solution is designed to increase space and headroom, enhance daylight, and improve ventilation.
- More daylight compared to a conventional dormer with the same glazing area.
- Can be installed in just one day, often without planning permission.
- Less external maintenance and movement compared to existing dormer solutions.
- Combine with solar, electric or manual roof windows.

Dormer

More space and up to three times more daylight

The unique design of the VELUX Dormer roof window system allows more natural daylight to enter the room compared to a traditional dormer. It increases usable space, creates a light and airy atmosphere, and fills the room with up to three times more daylight than a traditional dormer.

· Creates more headroom, increases daylight and improves ventilation, contributing to a healthier indoor environment.
· Enhances overall thermal performance.
· Can be installed in just one day, often without planning permission.
· Less external maintenance and movement compared to existing dormer solutions.
· Can be combined with solar, electric or manual roof windows.

Cold room windows: GVK, GVT

The VELUX Cold room roof window is designed for use in uninhabited rooms where easy access to the roof and regular ventilation is needed. Side-hung, it opens to the left or right depending on your preference. The roof window is made from maintenance-free aluminium and polyurethane and comes with integrated flashing.

· Three ventilation positions for constant low-level air flow.
· Patented opening restrictor securely holds the roof window open at 90°.
· Safe roof access using the moulded tread with grooves (GVT).
· Extruded aluminium sash for a maintenance-free roof window.

Electric smoke ventilation roof windows: GGU

The VELUX Smoke ventilation roof window is designed to quickly release smoke and excess heat. The ventilation control system can enable several functions including automatic opening. It can also be opened to let in fresh air for improved indoor comfort. The Smoke ventilation roof window is extensively tested and compliant with all EU requirements.

· Available for 1m² (SK06 size) or 1.5m² (UK08 size) of smoke-free ventilation area.
· Opens to full fire position in just 60 seconds when smoke ventilation is activated.
· Same exterior design as other VELUX sloped roof windows.
· Tested according to DIN EN 12101-2.
· Compatible with wind deflector KFD to optimise the aerodynamic ventilation areas.

Installation and flashings

A VELUX installation
is all about quality
and efficiency

10
Year
Guarantee

High-quality installation products included in the flashing set

Pro+ flashing set
(2000 variant)

Installation products

Insulation collar BDX

· Insulates around the roof window frame, reducing heat loss and eliminating cold bridges.

· Flexible Insulation collar can be compressed for quick installation.

· The combination of rigid and flexible foam ensures a tight, energy-efficient installation to the roof construction.

Underfelt collar BFX

· Ensures a perfect fit and watertight seal between the roof window, battens and the roofing underfelt.

· Easy to fit – simply place on top of the roof window and unfold.

· An adjustable and self-supporting drainage gutter is included in the BFX. This leads the water away from the head of the roof window if there is a leak above.

Flashing sets

Our flashing sets contain everything you need for the best possible installation.

Our flashing sets have been carefully designed to make every step of the installation process as simple as possible. For example, the magnetic screws make mounting easier and the BFX Underfelt collar can simply be unfolded into place.

Even disposal is easy as the packaging no longer contains plastic. You can recycle it all as cardboard waste.
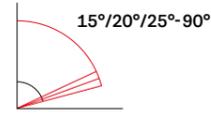

Pro+ flashing set

An upgraded flashing set with added insulation for reduction of heat loss and cold bridges.

· Including Insulation collar BDX.

· Including Underfelt collar BFX and drainage gutter.

Availability and ordering process

· To ensure the perfect integration of VELUX roof windows into an in-roof solar panel system, you need 4 products: the VELUX roof window and VELUX Solar integrator flashing. The connector for the connection to the solar panel system is available from the solar panel provider.
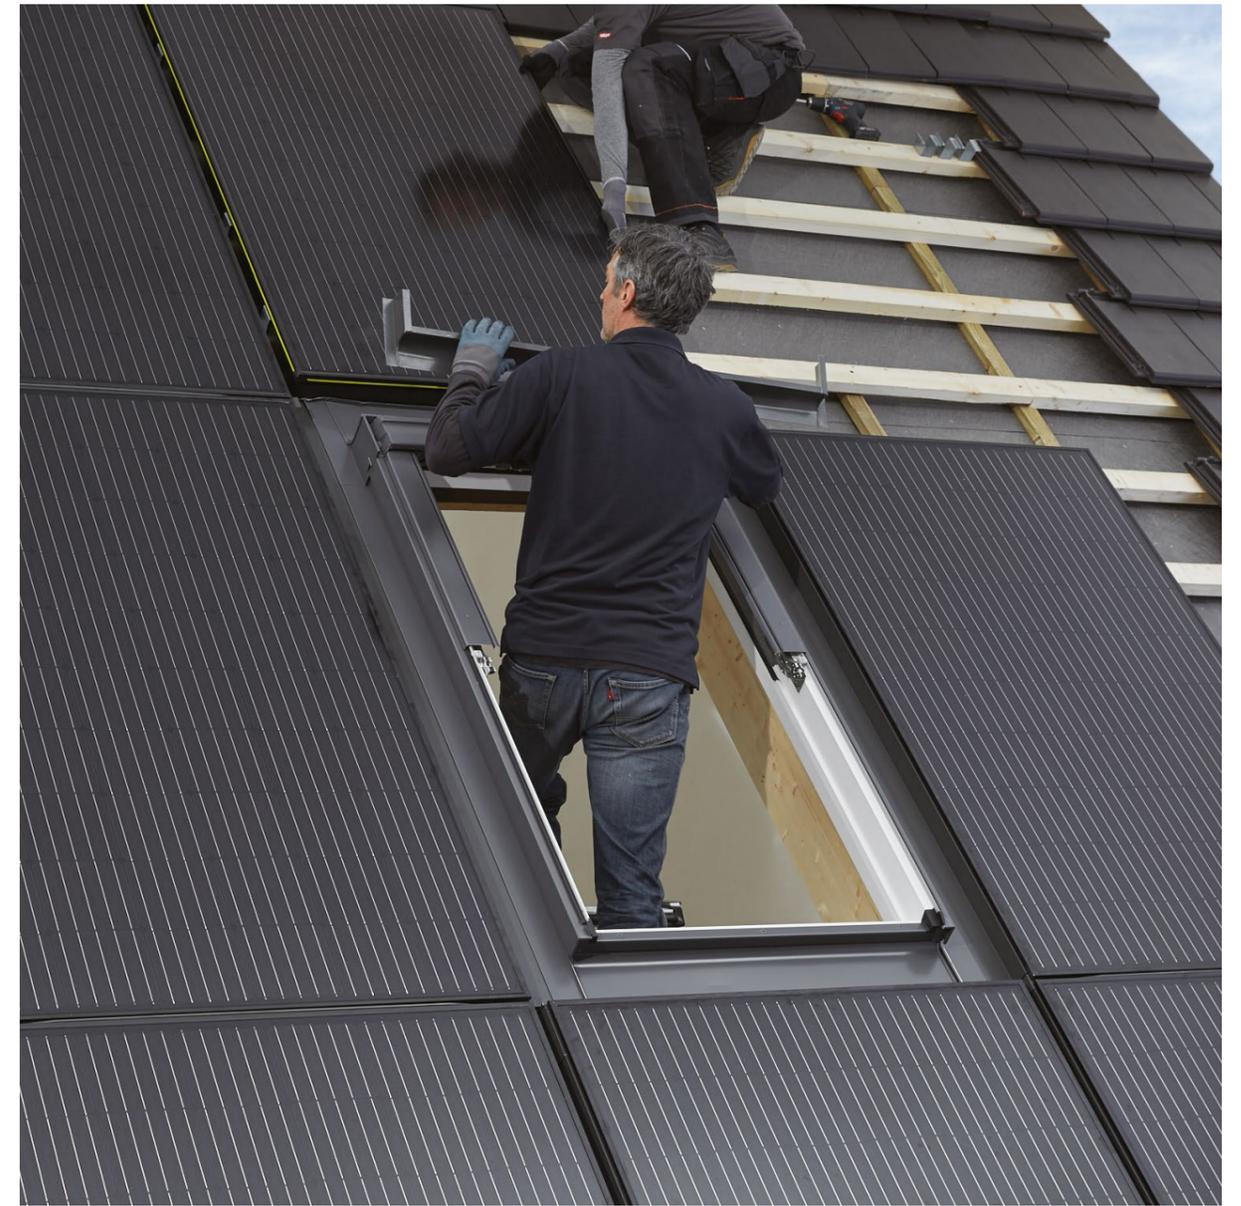

Solar integrator

Flashing for integrating VELUX roof windows into in-roof solar panel systems

Live a healthy, sustainable and comfortable life.

This specially developed flashing system enables seamless integration between VELUX roof windows and a variety of built-in solar panel systems. The roof can then be used to its full potential - generating solar energy while creating a comfortable living space.

· Fits perfectly into the PV panel allowing for a fast, secure and seamless integration.
· No need to compromise - enjoy daylight through the roof, a healthy indoor environment and reduced energy usage and costs, all at once.
· The flashing does not cover or block the active part of the solar panel, ensuring maximum energy generation.
· A range of installation position permutations allows flexibility in design and installation.
· Easily integrates with selected PV solar panel systems for optimal roof utilisation.

ELX 15°- 80°

Details

- Minimal disruption as existing lining is retained.
- On most occasions, the work can be carried out from the inside.
- Replacement installation for a single roof window usually takes under a day.
- For flat or profiled roofing material.

Benefits of replacing your roof window

- Energy saving of up to 16% - modern roof windows have better thermal insulation properties. By replacing an old roof window with a new GGU-66 window you will have a heating energy saving of up to 16%.
- More light and fresh air – new VELUX roof windows have larger glazed areas and come in white finishes to match modern interiors.
- More choice, more comfort – modernise your roof windows; from improving noise reduction to controlling from your smartphone, there's a solution for every project.

Upgrading your old roof windows couldn't be easier with the VELUX Installation Service **velux.co.uk/installation**

Replacement flashings

VELUX replacement flashings make it easy to replace VELUX roof windows without removing the existing lining. The roof windows are simply replaced in the existing aperture. This lets you enjoy a new roof window without the extra work involved in interior decoration or bathroom retiling.

Profiled roofing material EW

- For replacing a VELUX roof window from before April 2001 while maintaining the original installation level of the roof window.
- For profiled roofing material up to 120mm.

Slate EL

- For replacing a VELUX roof window from before April 2001 while maintaining the original installation level of the roof window.
- EL is a flashing for slate up to 8mm thick.

Flashing adaptor ELX

- The flashing adaptor kit ELX is used for replacing roof window combinations and also in conjunction with standard single flashings like EDW and EDL. However, this is only when replacing an old roof window where the internal finish is not being replaced and the roof window is placed higher above the red line than normal.

The combination system

If you want to install roof windows in combination, the combination flashing system lets you do so efficiently. The system can be used for combining all main roof window types in your preferred formation.

The system consists of seven elements that enable your chosen combination

For a roof window combination to function together, it is required that:

· Roof windows above each other are the same width.
· Roof windows next to each other are the same height.

a. Frame distance per flashing type

· EKW/EKL/EKP: flexibility between 100 - 160mm (M) with the Adjustable middle gutter.
· EKN/EKJ: 100mm (E). Available with the Adjustable middle gutter from September 2025.
· Other frame distances between 60mm to 400mm can be specially ordered.

b. Standard frame distance 100mm (E)

· When installing an exterior shutter, a frame distance of 250mm (J) is needed.

VELUX Pro+ combination flashing set

The VELUX Pro+ combination flashing set includes made-to-fit and easy-to-install insulation and watertight collars. These components reduce heat loss and cold bridges and provide extra security against water penetration.

This set also features the new VELUX Adjustable middle gutter – our innovative and patented solution that makes roof window combination installations even easier. The middle gutter can be adjusted to widths between 100 - 160mm, ensuring that it always fits to the actual rafter dimensions, giving peace of mind when it's not possible to obtain exact measurements.
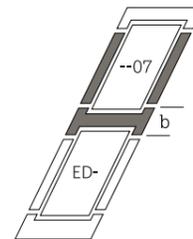

Add value to your projects by installing bigger and better solutions to bring more of the outdoors in.

· Everything you need in one order.
· Includes new VELUX Adjustable middle gutter.
· Ensures a watertight seal between the roof windows, battens and the roofing underfelt.
· Reduces heat loss and eliminates cold bridges.
· Ensures perfect installations every time.

All you need in one box*

| Flashing | Adjustable middle gutter | Underfelt collar (BFX) | Insulation collar (BDX) |
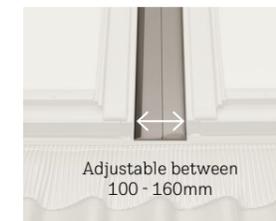

Adjustable between 100 - 160mm

Launch dates
The VELUX Pro+ combination flashing set for recessed installation height (blue level) will launch in September 2025. When ordering, look for the letter M at the end of the product code – this means the VELUX Adjustable middle gutter, insulation collars and underfelt collars are included. For example: EKW MK06 2021M for a side-by-side combination.
* Contents illustrated for EKW MK06 2021M side-by-side combination.

Flashings for combinations

If you want to use multiple VELUX roof windows in your room, VELUX combination flashings give you the interconnectivity needed for easy installation. They are designed for all combinations of VELUX roof windows and give a watertight installation.

- For multiple VELUX roof windows.
- High-quality watertight installation.
- Maintenance-free exterior.

Roof pitch

15°-90°

Characteristics

· Unique, welded rubber seal gasket fits precisely into the roof window groove.

· Welded and reinforced corners provide extra security against penetration.

Vapour barrier collar

Save time and hassle by using the VELUX Vapour barrier collar that fits perfectly into the groove of the roof window.

The Vapour barrier collar guarantees a secure and airtight solution and prevents condensation from forming in the roof construction.

· Fits perfectly to the dimensions of the roof window.
· Pre-fitted rubber seals along all sides guarantee a vapour-tight solution.
· Unique application tool ensures one-step procedure.

Roof pitch

15°-90°

Characteristics

· The white finish provides maximum daylight influx.

· The shape ensures correct warm air circulation that helps to prevent condensation.

Lining

If you want a ready-made solution, our prefabricated linings make installation easy, with no need for additional painting or adhesives.

VELUX linings are made in water-resistant and maintenance-free PVC material and fit perfectly with VELUX roof windows.

· Click-on brackets save time and ensure correct installation.
· Design enhances insulation and minimises cold bridges.
· Includes BBX vapour barrier for an airtight seal.

3-year guarantee for manual interior blinds, insect screens and manual exterior anti-heat blinds.

Protect your home all year
round with VELUX exterior
Anti-heat blinds and shutters

Outdoor protection, indoor comfort all year round

Our wide range of VELUX exterior anti-heat products helps protect your home from overheating in the summer and provides extra insulation on cold days, keeping your indoor temperature comfortable. Our solar products use daylight energy as their power source, eliminating the need for wiring and offering a seamless installation from inside the room.

All year round temperature control
Create a shield between the sun's rays and your roof windows to prevent the direct sunlight from entering your home. This helps to keep the indoor temperature cooler, reducing the need for air conditioning and lowering energy costs. In colder months, shutters provide an additional shield from the outside to keep the warmth in.

Durability and longevity
Crafted from high-quality materials, our anti-heat blinds and shutters are designed to withstand the harshest weather conditions, while maintaining their functionality and visual appeal for years to come.

Easy installation
Designed to seamlessly match your VELUX roof windows, our products offer a hassle-free installation. With installation taking place from inside the room, you'll have your new anti-heat blinds or shutters up in no time!

Discover the exterior blind or shutter that best meets the needs of your home.

Nature collection

For design and environmentally-conscious consumers, our Nature Collection roller blinds come in a range of colours that allow you to bring the peace and tranquility of nature directly into your home. The blinds are made from a minimum 50% recycled fabric and 75% recycled aluminium and have a lower carbon footprint than the standard option. This allows you to enjoy the same high quality as every VELUX product but, with a 50% reduced carbon footprint during production compared to ordinary VELUX blinds.

Blackout roller blind DKY

· Excellent blackout to darken the room.

Translucent roller blind RFY

· Softens incoming light and provides privacy.

**Blackout roller blind DKY and Translucent roller blind RFY**

· Available with white or brushed aluminium side rails.
· Combine with an exterior anti-heat blind or shutter for effective heat protection. Read more on page 106.
· Combine with an Insect screen to enjoy fresh air without unwanted visitors. Read more on page 127.

Installation

· Quick and easy installation with pre-fitted brackets.

Certifications

· Standard 100 by OEKO-TEX® (2276-378) – textiles tested for certain harmful substances.
· STeP by OEKO-TEX® (22002567) – STeP stands for Sustainable Textile & Leather Production.
· Our products hold verified EPD certificates complying with the European Standard EN 15804+A2.

Insect screen

Enjoy fresh air without unwanted visitors with a VELUX Insect screen. The screen is simple to operate and can be combined with any other VELUX interior or exterior blind. It has transparent net fabric and stows neatly away in the slim top casing when not in use.

· 100% insect-proof material.
· Transparent net fabric does not obstruct your view.
· Durable, wind-resistant fabric for long-lasting performance.
· Standard 100 by OEKO-TEX® (1076-184) – textiles tested for certain harmful substances.
· STeP by OEKO-TEX® (22002567) – STeP stands for Sustainable Textile & Leather Production.
· The screen can be combined with any other VELUX interior or exterior blind.
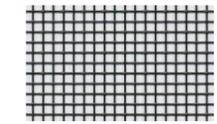

Determine the correct size

· Measure the inner wall width (**A**) and height (**B**) to find the size code and price of your insect screen in the table below.
· If you have two heights (**B**) or heights above 2400mm – two insect screens and one connector set ZOZ 157 SWL are needed.

· **IMPORTANT:**
Insect screen size codes may differ from window size code, please measure (**A**) and (**B**) and find correct size code in the table below before ordering.

Installation

· Quick and easy installation.

*   Daylight area stated as per method in EAD 220062-00-0401 (CE marking). Numbers mentioned are for a size 100100.

**   U-value, area and sound insulation is stated for fixed variants with either 2-layer dome (dome), Q variant 2-layer glazing unit (dome with glazing) and 2-layer glazing unit (flat glass and curved glass). U-values and areas are calculated for roof window size 1.2x1.2m, with a kerb height of 300mm, in accordance with method in EN 1873:2014+A1:2016.

*** Complies with EU legislative requirements for burglary resistance, class 2.

Curved glass rooflight

Solar, electric or fixed variants available

The VELUX glass rooflight with curved glass is a revolution in roof window design. The unique design with a slim frame and invisible sash provides maximum daylight and a beautiful glass-to-edge view from inside the home – even with a blind installed. In addition, the curved-shaped glass top allows rainwater to easily drain off the surface – even on 0° roof pitches.

- Maximum daylight area.
- Excellent energy performance.
- State-of-the-art design.
- Excellent sound reduction.
- Clear view and drainage.

Autumn 2025

Glass rooflight electric roof exit

Curved or flat glass variant available

This Glass rooflight exit offers easy access to the roof for repairs or maintenance. A mandatory exit safety and comfort ventilation kit is supplied with each rooflight. The kit ensures safe use of the exit rooflight in terms of entrapment and fall-through protection, as well as enabling comfort ventilation.

To access the roof for repairs, the rooflight can be opened and fixed into service mode, using the indoor switch and the key, which are part of the exit kit. This ensures that the rooflight is not accidentally closed. Once on the roof, the rooflight can be closed and locked with the key to ensure safety while working on the roof.

The Glass rooflight exit is compatible with the VELUX exit power supply – KES 303 EU.

Blinds for curved and flat glass rooflights

Anti-heat blind
The Anti-heat blind provides light dimming and heat protection to maintain a cool and comfortable room. The blind is discreetly placed inside the rooflight, and is easily installed from the roof when installing the rooflight.

· Reduces overheating.
· Semi-transparent fabric for light control and sky view.
· Solar-powered blind with remote control.
· Not compatible with Blackout blind.

Blackout blind
VELUX Blackout blind for glass rooflights blocks outside light anytime and is perfect for bedrooms. It is discreetly placed inside the rooflight and easily installed from the roof when installing the rooflight.

· Perfect sleep – day or night.
· Excellent blackout.
· Great for bedrooms and media rooms.
· Solar-powered blind with remote control.
· Not compatible with Anti-heat blind.

Insect screen
VELUX Insect screen for glass rooflights lets you enjoy fresh air and a view to the sky without the distraction of insects. It comes in a contemporary white design and is easy to install and simple to remove for cleaning.

· Fresh air and 100% insect-proof.
· Durable, transparent net fabric does not obstruct your view.
· Can be combined with an Anti-heat blind or a Blackout blind.

Important!
Remember to install blinds at the same time as rooflights

Dome with glazing

Fixed or electric options available

The VELUX Dome with glazing is an advanced dome solution for installation in 0-15° roof pitches. It is an effective product for letting in daylight and fresh air, without compromising on energy efficiency and comfort with sun and heat protection products. The insulated base unit has an integrated 2-layer insulating glass unit and the polycarbonate top unit is available in a clear or opaque version.

- Good daylight area.
- Good energy performance.
- Classic design.
- Good sound reduction.

Details

· Note: this product is not compatible with VELUX flat roof blinds FMG, FMK and MSG.

Roof exit

The manually operated Roof exit window opens extra wide to provide easy access to the roof. Fully compliant with all relevant EU legislative requirements, the VELUX Roof exit is a double glazed roof window with a laminated inner pane that prevents glass from splintering in the event of breakage. It is available with an opaque or clear polycarbonate dome.

· Extra-large opening for easy access to the roof.
· Improved comfort with low-energy double glazing.
· Tilted interior frame increases daylight in the room.
· Opening angle of approximately 60°.
· Excellent insulating value and sound reduction.

Details

· Specific smoke ventilation accessories may be required and can be purchased separately.

· Only compatible with VELUX flat roof blinds FSK and MSG. An approval by local fire authorities is needed before installation.

Smoke ventilation

The Smoke ventilation roof window automatically opens when smoke and fire are detected to release smoke and excess heat. It can also be opened for fresh air to improve the indoor climate. Its burglar-proof construction provides additional security while a laminated inner pane prevents glass from shattering if it breaks.

· Available for 1.13m² (100x100cm) or 1.48m² (120x120cm) of smoke-free geometric ventilation area.
· Compliant with EU legislative requirements.
· Automatically opens in case of fire.
· Heavy-duty reliable scissor opening mechanism.
· Low-energy double glazing with two energy coatings.
· Tested and certified to EN ISO 12101-2.

Blinds for dome with glazing*

Anti-heat blind**
VELUX anti-heat blind provides light dimming and heat protection so your indoor temperature stays cool and comfortable. This makes it perfect for living rooms with activity during the day.

- Reduces solar heating.
- Semi-transparent fabric lets in natural light.
- Available in solar powered operation with app and remote control.

Blackout energy pleated blind
VELUX blackout energy pleated blind for flat roof windows darkens the room and protects against cold. This makes it the ideal choice for bedrooms and living rooms.

- Blackout and insulating effect.
- Available in solar-powered and electric operation with app and remote control.
- Standard 100 by OEKO-TEX® (1076-184) – textiles tested for certain harmful substances.
- STeP by OEKO-TEX® (22002567) – STeP stands for Sustainable Textile & Leather Production.

* Also compatible with Curved and Flat glass roof windows (CFP/CVP) bought before July 2021. Solar-powered blinds are not compatible with opaque top unit.
** Anti-heat blind not compatible with flat glass top unit (2093).

Dome

Fixed or vented options for uninhabited rooms or buildings

The VELUX Dome is a traditional dome solution for uninhabited rooms or buildings such as warehouses, garages, sheds or smaller industrial buildings. It is available in a fixed or vented version, and with 2 or 3-layer dome skins. A motor and vented frame can be added to the fixed variant to add ventilation – even after installation. Available with a fall-through grid for added safety. No blinds are available for this product.

· Basic daylight area.
· Basic energy performance.

Roof pitch

 0°-15°

Details

· Available with 2 and 3-layer opaque dome skins in polycarbonate.
· Opaque surface provides diffused daylight, improving the light needed for working.
· Choose between 15 and 30cm base unit.
· Comes in a fixed or electrically vented variant.

Replacement frame

· Replace your existing, third-party dome solution with the help of a replacement frame.
· A quick and easy solution for replacement purposes.
· No need to install a new base unit.
· Fits all VELUX dome tops.

ZCJ 0000

Replacement kit for ventilation

· Make your fixed VELUX Dome solution electrically ventilated with this replacement kit.
· Combine with replacement frame to upgrade third-party domes to ventilated.

ZCJ 1210

Motor placement

· On all rectangular sizes, the motor is placed on the long side. Please refer to the installation instructions for further details.

Sun tunnel, sloped roof

Rigid and flexible tunnel options available

Add natural light to spaces where you never felt it was possible with a VELUX Sun tunnel. Perfect for windowless bathrooms, walk-in wardrobes and hallways.

Use rigid sun tunnels when there is direct access between the roof and the ceiling of the room. Flexible sun tunnels should be used when there is an object, such as a beam, restricting access.

Rigid sun tunnels

· Recommended for maximum daylight, because of its super high reflective coating.
· Up to 98% daylight reflectivity for optimal natural light conditions.
· Elegant, maintenance-free exterior glass module.
· Recommended tunnel length 0.9-6m.
· 1.7m tunnel supplied (ZTR extensions are available).
· Available in 25cm and 35cm diameters.

Flexible sun tunnels

· Flexible fibreglass tunnel, with reflective inner coating.
· Elegant maintenance-free exterior glass module.
· Recommended tunnel length is 1.5m.
· 2m tunnel supplied.
· Available in 35cm diameter.

Sun tunnel, flat roof

Flexible tunnel

Used for installation in flat roofs to bring natural light into areas of the house where a flat roof window installation is either not possible or not appropriate. The frame is made of white PVC. Supplied with polycarbonate dome.

Flexible sun tunnels

· Flexible fibreglass tunnel, with reflective inner coating.
· Recommended tunnel length for flat roof is between 0.2m and 0.9m.
· 0.9m tunnel supplied.
· Available in 35cm diameter.

Roof window accessories

Electric accessories

Power supply KUX 110

Power supply for remote operation of VELUX electric anti-heat blinds and shutters or interior blinds on a manual roof window or fixed flat roof window.

Upgrade kit KSX 100K

Complete solar-powered upgrade kit for VELUX Manual centre-pivot roof window. Upgrades manual roof windows to remote operation with no wiring needed. Includes rain sensor. For roof windows manufactured after February 2014. Not compatible with CK01, CK02, MK27, PK25 and SK01.

Battery backup KLB 100

The battery backup ensures that if there is a power outage, VELUX electrically operated roof windows are closed and VELUX electrically operated blinds/shutters are raised. It is recommended for use in regions affected by frequent power failures.

VELUX Wall Switch – roof windows KLI 311

The wireless Wall Switch KLI 311 lets you conveniently open, stop and close VELUX solar and electrically operated roof windows or VELUX roof windows

that have been upgraded for electric or solar operation. One switch can be used to operate several roof windows.

VELUX Wall Switch – interior sunscreening KLI 312

The wireless Wall Switch KLI 312 lets you conveniently open, stop and close VELUX solar and electrically operated interior blinds. One switch can be used to operate several blinds.

VELUX Wall Switch – exterior heat protection KLI 313

The Wall Switch KLI 313 lets you conveniently open, stop and close solar or electrically operated VELUX exterior anti-heat blinds and shutters. One switch can be used to operate several exterior blinds or shutters.

VELUX Interface KLF 200

KLF 200 is programmable and can be used for operation of io-homecontrol® compatible electrical products via external control devices like switches and sensors (potential-free contacts). Can operate 5 products or 5 groups with up to 200 electrical products. Can also be used as an io-homecontrol® repeater.

Upgrade kit KSX 100

Complete solar-powered upgrade kit for VELUX Manual centre-pivot roof window. Upgrades manual roof windows to remote operation with no wiring needed. Includes rain sensor. For roof windows manufactured between April 1986 and January 2014. Not compatible with M27, P25 and 425.

Rod controls

Telescopic control rod ZCT 200K

The 100-180cm expandable rod enables operation of VELUX manually operated centre-pivot roof windows, interior blinds and insect screens installed out-of-reach.

Control rod extension ZCT 100

Extension piece for telescopic control rod ZCT 200K, adding an additional 100cm to the 180cm long telescopic control rod.

Interior blind adaptor ZOZ 085

Adaptor to allow remote operation of interior blind by control rod ZCT 200K.

Locks and restrictors

Security lock ZOZ 012K1

Extra security lock for VELUX centre-pivot roof windows that prevents the roof windows from being opened from the inside without a key.

Opening restrictor with key ZOZ 010KC S011

Opening restrictor (safety latch) that prevents VELUX centre-pivot roof windows from opening more than 10cm. Suitable for roof windows of frame height 98cm and above.

Maintenance kits

ZZZ 129KI

Professional repair kit designed to cover up marks and top-finish scratches on VELUX white maintenance-free roof windows.

ZZZ 130KI

Professional repair kit designed to repair marks and top-finish scratches on VELUX white painted roof windows.

ZZZ 131KI

Care kit for VELUX white painted roof windows. Includes special cleaner for removal of oil and grease, protector to restore the water-repellent surface and an application sponge.

ZZZ 176KI

Professional repair kit designed to repair marks and top-finish scratches on VELUX clear lacquered roof windows.

Installation tools

ZOZ 246

Dual solar switch allows charging of both shutters and awnings on solar-powered VELUX roof windows. Dual solar switch is required if the shutter or Anti-heat blind is size C or F and installed on a solar-powered VELUX roof window.

Practical information

Practical information

VELUX installation training

We offer different training formats to suit your business needs. You can learn online via the VELUX Online Training Academy for our installation and product courses. You can also attend our training facilities in person, or alternatively, our mobile training unit can visit your site and provide tailor-made training (subject to terms).

Find out more at **velux.co.uk/training**

Interested in becoming a VELUX Certified Installer?
Go to **velux.co.uk/certified** to find out more information.

VELUX Rewards

You can earn rewards with a large range of VELUX products all year round! Simply sign up for a VELUX Rewards account and upload invoices for any qualifying products. Once approved, your account will be credited with points that you can spend with our large range of top brand partners. With between £3-£30 Rewards available on most products, your points can really add up, so make sure you claim every time! Terms and conditions apply.

Register at **velux.co.uk/rewards**

Dealer information

The easiest way to place a merchant order is via our Dealer Extranet or EDI platforms. VELUX Dealer Extranet offers a number of additional features, such as creating quotes, client quotes, delivery track and trace, return requests and much, much more.

Access Dealer Extranet at **dealerextranet3.velux.co.uk**

EDI (Electronic Data Interchange) may be a suitable option for merchants who place a large number of orders each month. VELUX can accommodate a number of different EDI formats.

To explore options, please email: **etrading@velux.co.uk** with your requirements.

Online professional tools

The VELUX website contains everything you need to know about our products and installation. The latest product information, installation instructions and a number of visualisation tools can be found online.

See all tools and resources at **velux.co.uk/professional**

Guarantees

All VELUX products and accessories are thoroughly tested to deliver the high quality you expect. In the rare event that your VELUX product doesn't meet your expectations, we offer the following guarantees:

10-year
VELUX pitched and flat roof windows, sun tunnels and sealing products.

5-year
Solar or electric external shutters and anti-heat blinds.

10-year
All sloping solar and electric roof windows.

3-year
Interior blinds and Insect screen, manual anti-heat blinds, motors and accessories for solar and electric products.

Register your products at **velux.co.uk/extendedwarranty**

On roof windows next to each other a minimum distance of 18mm is required.

Standard glazing

Glazing features

☁ **Rain noise reduction**
Enjoy undisturbed sleep without being woken by rain noise on the roof window.

⊛ **Safety lamination**
Prevents glass from falling into the room in case of accidental breakage.

⚒ **Toughened glass**
Adds strength to the outer pane to protect from wayward balls and extreme weather such as heavy storms and hail.

☀ **UV filter**
Protects your interior furnishings from fading due to the sun's harmful UV rays.

▨ **Easy-to-clean**
Dirt-repellent coating lets you spend less time cleaning and more time enjoying the view.

◌ **Anti-dew**
Hydrophobic coating reduces the amount of dew that can form on the outside for a clearer view.

Heat protection

Glazing 69
This 3-layer glazing filters out the heat from the sun's rays to keep your home more comfortable. High thermal efficiency prevents the feeling of cold that comes from a roof window during winter.

Roof window replacement

Replacing a VELUX roof window is easier than you think. It can be done in as little as 4 hours, and it allows for improved energy efficiency, a better indoor climate and more daylight and fresh air.

· Same standard VELUX sizes available.
· Usually fitted quickly and easily from the inside.
· Minimal mess and disruption to internal finish.

How to locate the roof window type and size

The same standard sizes are still available today and there are plenty of opportunities for upgrading. Flashing for replacements can be found on page 92.

For advice on what type of operation and finish of roof window to select, go to page 20.

Upgrading your old roof windows couldn't be easier with the VELUX Installation Service **velux.co.uk/installation**
