

Finding the right solution for your single storey extension

Maximising daylight

1

VELUX roof windows and bi-fold doors work in combination, creating a lighter and brighter space. Roof windows transform the way light flows into a room throughout the day and also allow more natural daylight to penetrate into the existing part of the home.

2

Installing the right number, type and size of roof windows means you will benefit from more daylight, more fresh air and a better indoor climate.

3

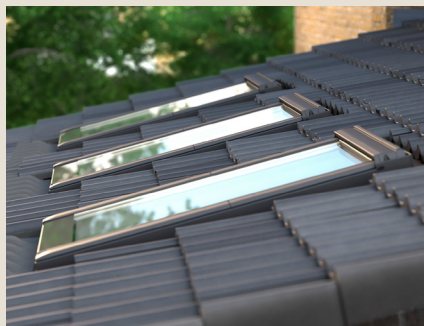

We recommend your glazing is at least 20% of the floor space - fitting multiple roof window solutions will help you maximise daylight and achieve this.

A VELUX solution for any roof pitch:

Sloping roof

A range of solutions suitable for roof pitches from 15°.

Low pitch roof

Innovative solution for low pitch roofs from 10°.

Flat roof

A range of solutions suitable for roof pitches down to as low as 0°.

The perfect products for your project:

VELUX sloping roof windows

Choose multiple solar-powered roof windows for more fresh air, daylight, comfort and convenience.

VELUX Low pitch roof windows

Designed to be fully watertight at a low pitch and features glass-to-edge technology - providing an elegant external appearance.

VELUX flat roof windows

Maximise daylight, comfort and convenience with our solar-powered glass rooflights thanks to state-of-the-art design.

Create a comfortable space:

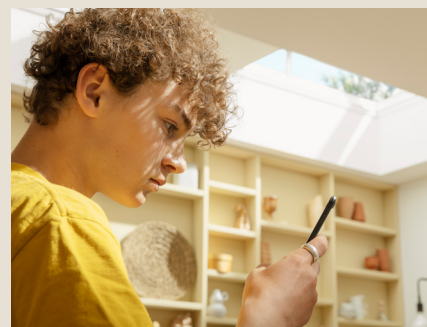

VELUX internal blinds

Soften incoming light, provide privacy or blackout in any room.

VELUX external Anti-heat products

Prevent direct sunlight from entering the home and reduce rain noise.

VELUX Intelligent home control

A range of smart control solutions allow you to take control of your indoor comfort with ease.
