

Finding the right solution for your loft conversion

Get the daylight right

1

More often than not, roof windows can be the only source of daylight in a loft space - Did you know that you get three times more daylight from roof windows than façade windows of the same size?

2

Install the right number, type and size of roof windows - Benefit from more daylight, more fresh air and a better indoor climate.

3

We recommend your glazing is at least 20% of the floor space - Fitting multiple roof window solutions will help you maximise daylight and achieve this.

Optimise the floor and head space:

VELUX top-hung roof window

Outward opening offering a panoramic view

VELUX Balcony roof window

Transforms from roof window to a balcony in seconds

VELUX Dormer

Increases headroom and usable space, flooding the room with daylight

Achieve maximum daylight and fresh air:

VELUX combination solution

Create your own daylight solution with enhanced views and space

VELUX 3in1 roof window

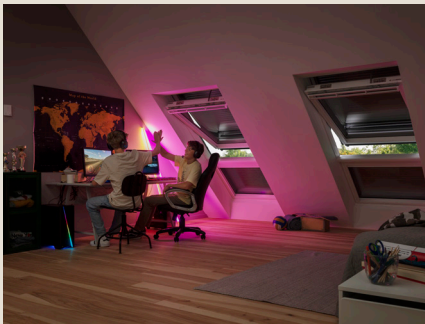

Maximise daylight, fresh air and panoramic views in any loft space

VELUX solar operated roof window

Provides fresh air, better indoor comfort and home security for effortless living

Create a comfortable space:

VELUX internal blinds

Soften incoming light, provide privacy or blackout in any room

VELUX external Anti-heat products

Prevent direct sunlight from entering the home and reduce rain noise

VELUX Intelligent home control

A range of smart control solutions allow you to take control of your indoor comfort with ease
