# VELUX electric roof window GGL

# Glazing 70

The VELUX electric, centre-pivot roof window GGL is a wired solution that operates remotely using a wall switch – perfect for both in-reach and out-of-reach installations. The roof window has an integrated and silent motor. And if it rains, the rain sensor automatically closes the window.

- Rain sensor automatically closes the window in the event of rain.
- Mains-powered to allow for complete, seamless integration of your roof window into your home.
- The motor is hidden in the top cover and totally invisible from view.
- Easily control your roof window with the wireless wall switch that offers simple open/close/stop functionality.
- Entrapment control detects objects in the path of the window.
- Silent motor keeps rooms quiet for sleeping children or simply for improved well-being.
- Compatible with VELUX ACTIVE with NETATMO for a better indoor climate with sensor-based ventilation. Remote controlled via smartphone or voice.

# Application guidance

The window can be installed in roof pitches between 15° and 90° to the horizontal.

VELUX electric and solar roof windows are easily operated by a wireless wall switch, providing fresh air at the touch of a button. Perfect for both within-reach and out-of-reach applications where extra comfort and convenient operation is required. For optimum view, choose longer roof windows for lower roof pitches.

NPD: No Performance Determined

### Visible features

### Window operator, electric

Fully-integrated mains-powered motor is hidden from view in the top of the frame and is operated by remote control.

### Integrated rain sensor

The window closes automatically in the event of rain or is prevented from opening thanks to the rain sensor.

### Ventilation flap

The full-width ventilation flap can be used for ventilation even with a closed window. The ventilation flap is connected to the top sash with the lock casing.

### Blind bracket, electric

Easily install electric blinds on the window without the need for extra tools. Simply click on the blinds in the pre-fitted brackets and they are connected for remote control.

### Frame hinge, centre-pivot, side

Durable hinge design allows for reliable operation and enables the sash to be rotated for easy cleaning of the outer glass.

### Barrel bolt

The barrel bolt can be placed into the integrated barrel bolt bushing to secure the window for cleaning of outer glass surface or for safe ventilation.

### Interior insulation, frame top sides

Innovative ThermoTechnology $^{\text{TM}}$  insulation is integrated into the top frame sides of the window to increase energy-efficiency.

### Data plate

Every VELUX roof window has a unique data plate with information that can be used to look up CE marking documentation, when purchasing accessories or in case of service or replacement.

# Cleaning and maintenance

To clean the outer glass surface from the inside, rotate sash manually and secure in cleaning position with barrel bolts.

VELUX repair and maintenance kits are

# Guarantee period

# Flashings and installation products

### **Flashings**

Install the VELUX roof window in virtually any roofing material by using genuine VELUX flashing solutions. Our flashings are designed specifically for the exact size and shape of the roof windows to create perfect, watertight fit. Flashings can also be used to combine multiple roof windows.

### **Installation products**

Ensure a proper installation and an air- and watertight connection between the window and roof with VELUX installation products. All installation products are designed to perfectly fit the roof window for a reliable and durable result.

# Blinds, awnings and shutters

Complete the VELUX roof window installation with roller shutters and awning blinds for heat protection and interior blinds for light dimming, blackout and insect protection. Choose from a wide range of manually operated or remote-controlled products that are made to fit the particular window type and size. Please contact your local VELUX sales company for more details about compatibility.

## VELUX ACTIVE with NETATMO compatible

Compatible with VELUX ACTIVE with NETATMO for a better indoor climate with sensor-based ventilation. Remote controlled via smartphone or voice.

# Further information

We reserve the right to make technical changes.

### Technical information

VELUX electric roof window GGL

Installation and use

The window is classified in protection class IP44. The window operator is hidden in the top cover and functions at temperatures between -10  $^{\circ}\text{C}$  and +60  $^{\circ}\text{C}.$ 

Installation in rooms with a high level of humidity must comply with relevant regulations (contact a qualified electrician if necessary).

**Window opening** The window operator permits a maximum opening of 200 mm within 35 seconds.

Due to a shorter chain, small/special window sizes have a different window opening. Window opening for sizes --K01 and --K02 = 135 mm. Window opening for sizes --K25 and --K27 = 38 mm. The chain engages and disengages automatically when

the window is closed.

Compatibility The roof window is based on radio frequency (RF) technology, 868 MHz range, and is

compatible with other VELUX products with the io-homecontrol® logo.

The roof window is prepared for subsequent installation of VELUX electric interior and exterior decoration and sunscreening products. It is compatible with all VELUX electric and solar decoration and sunscreening products but we recommend using

the electric ones.

Connection to non-compatible products may cause damage or malfunction.

**Connection** The window is equipped with a 4 m 2-core cable (H05VV-F) with a standard mains

plug for connection to the mains supply (2.5 m for the UK).

Pre-paired wall switch Materials ABS plastic, white (NCS S 1000-N)

Size and weight description

8.2 cm x 8.2 cm x 1.7 cm, 0.125 kg.

**Installation and use** The wall switch is for indoor use only, between a minimum ambient temperature 5

°C and a maximum ambient temperature 45 °C.

It can be used in a dry or humid environment (such as a living room or a bathroom).

Radio frequency range: 300 m range open field. Depending on the building

construction, the indoor range is approximately 30 m.

**Power consumption** 2 x alkaline AAA (1.5V) batteries

Expected battery lifetime: Up to 1 year.

Integrated rain sensor Materials Gold-coated sensor, Grey (RAL 7022)

Size and weight description

N/A

Power consumption N/A

rowei consumption

Window operator, electric Materials Motor casing of polybutulene terephthalate (PBT) with glass fibre, black (NCS S

9000-N). Stainless steel chain.

Size and weight description

362 x 50 x 110 mm (W x H x D), 0.987 kg

**Power consumption** 230/240 V a.c. – 50 Hz / 40 VA.

Stand-by power consumption (including rain sensor): max 0.5 W.

Additional stand-by power consumption for MML, SML or DML: 0.6 W. The operation of window and sunscreening product (3 cycles per day) will increase the

energy consumption by approx 2 kWh/year.

Motor capacity Traction capacity: Min 225 N

Pressure capacity: Min 150 N
