VELUX blinds FOP (blackout energy pleated FHC and awning blind MHL).

3 Year Guarantee

Get two products in one for blackout, insulation and heat protection. VELUX blackout energy blinds boost your home's energy efficiency while giving you all the sleep benefits of blackout. The double-pleated blackout cloth improves insulation and the flying design allows for the blind to be placed anywhere in the roof window. VELUX blackout energy blinds with white side rails fit perfectly with your white VELUX roof windows. The VELUX awning blind blocks the sun's rays before they hit the glazing and helps keep your room cool with effective heat protection on warm, sunny days. It is transparent so you can always enjoy your views and natural light. Easily installed from the inside.

- Heat protection keeps your room cool and increases indoor comfort.
- An extremely high blackout effect gives you great conditions for a good night's sleep or an afternoon nap.
- Thermal insulation keeps your room at a comfortable temperature during winter.
- A flying design lets you position the blind exactly where it is needed in the window while still letting light in.
- Maintenance-free design delivers peace of mind for the lifetime of your product.
- Manually operated blinds are a great choice for windows that are within reach.
- Slimmest profile design on the market lets more natural light in.
- Integrated side rails provide smooth operation.

Colours and patterns

VELUX interior blinds are available in a wide range of colours and designs. However, a few blind variants are only available in a limited range of colours. Each colour and design option has a unique code. Add the code of your choice to the relevant blind type when ordering your products.

Operation guidance

VELUX blinds FOP consist of two blinds. The blackout energy blind can be positioned anywhere in the window by means of the control bars at top and bottom.
The awning blind can either be rolled fully up or fully down. To roll down the awning blind, rotate the window 180° and fit the awning blind on the hooks on the outside of the bottom sash. When closing the window, the awning blind is automatically rolled out.
