### **QNG Requirements for Velux Products**

We can with the below statement, confirm that VELUX products fulfil QNG criteria:

Within the QNG certification process, the criteria does not impose requirements related to all Velux products. Thus, in the case where no criteria exist, we fulfil the certification and can be implemented without further documentation.

These following product groups do not have requirements and therefore fulfill QNG:

- Roof windows of either wood or polyurethane/wood
- Flatroof windows of polyurethane/wood
- Blinds and shutters

Furthermore, we can also declare that the requirements within the QNG criteria are complied with for Velux PVC windows. We can in that regard declare the following:

- No use of tin, cadmium and lead stabilizers
- No use of reproduction-toxic phthalate plasticizers of more than 0.1 %
- None of our PVC products contain substances of very high concern or substances from the candidate list in quantities of more than 0.1%

Yours sincerely,  
Birthe Uldahl Kjeldsen

Manager, Technical Values
