

VELUX roof balcony GDL

Transform your home and feel like being outside by simply opening your VELUX roof balcony. The innovative balcony opens in seconds to give your home more space, daylight and fresh air. Consisting of a top-hung roof window and a bottom section that unfolds into a glazed balcony with elegant balustrades, it's a balcony experience like no other.

- Enjoy extra space by converting your VELUX roof window into a roof balcony.
- Open the top section of the balcony for fast access to fresh air.
- Elegant side banister railings provide extra safety and a clear view to the outdoors.
- Open the window outwards up to 45° to enjoy a panoramic view and a feeling of space.
- Comes with a choice of white-painted surface to match most contemporary interiors or clear-lacquered surface for a natural wood atmosphere.
- Reduce your energy bill and increase your indoor comfort with VELUX ThermoTechnology™.
- Open the top control bar to the ventilation position for fresh air through a closed window.

Application guidance

The roof balcony can be installed in roof pitches between 35° and 53° to the horizontal.

The upper section of the balcony is a bottom-operated, top-hung roof window that opens outwards for an unobstructed, panoramic view. When the upper section is opened, the lower section can be pushed outwards to vertical position. As the lower section opens, integrated banister railings are raised on both sides. To get the full benefit of the balcony, we recommend an installation height that allows for a clear sight line to the outside from both a standing and seated position.

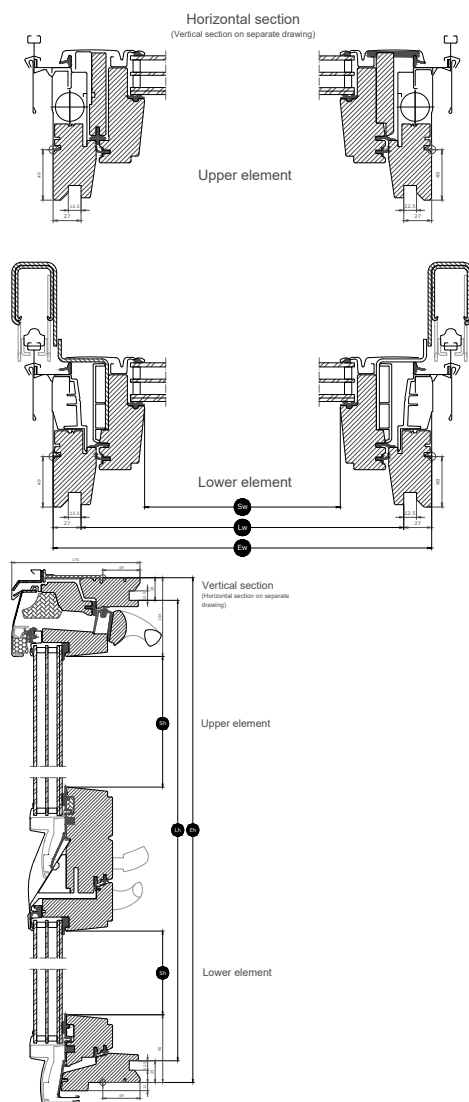

Available sizes and daylight area

The size overview shows the availability across the different glazing variants. Please note that the individual glazing variant may not be available in all the sizes shown.

	780	942	1140
2520	GDL MK19 (1.28) [1.65]	GDL PK19 (1.63) [2.04]	GDL SK19 (2.05) [2.51]

All measurements are in mm. () = Effective daylight area, m² [] = Geometric free area, m²

Cleaning and maintenance

Upper sash:
To clean the outer glass from the inside, turn the bottom handle and open the upper sash 5 cm. Then pull the control bar to rotate the sash fully. Secure the sash in this position by sliding the barrel bolts into the bushings at the bottom of the side frames.

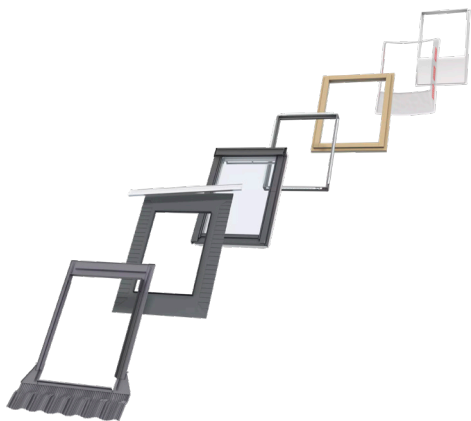

Lower sash:
To reach and clean the outer glass, open the upper sash by using the bottom handle.

VELUX repair and maintenance kits are available.

Flashings and installation products

Flashings

Install the VELUX roof window in virtually any roofing material by using genuine VELUX flashing solutions. Our flashings are designed specifically for the exact size and shape of the roof windows to create perfect, watertight fit. Flashings can also be used to combine multiple roof windows.

Installation products

Ensure a proper installation and an air- and watertight connection between the window and roof with VELUX installation products. All installation products are designed to perfectly fit the roof window for a reliable and durable result.

Blinds, awnings and shutters

Complete the VELUX roof window installation with roller shutters and awning blinds for heat protection and interior blinds for light dimming, blackout and insect protection. Choose from a wide range of manually operated or remote-controlled products that are made to fit the particular window type and size. Please contact your local VELUX sales company for more details about compatibility.
