

Product line: Light dome	
Product: TOP-90-PLUS	Size: 120 x 120cm
Dome shell material: PMMA [external+inside], SMP 16/7w-12 [inside]	Layer configuration: opal/clear/opal
upstand: ISO THERM Upstand	upstand height: 30cm
function: SHEV	Venting lift height: -
Hinge side: long side	Locking type: solo
SHEV system: FIREJET 165J SA 24V open/close	SHEV Electrical system: 24V/4A
Wind deflectors: No wind deflectors	fall through protection: -

All drawings in this document are for illustrative purposes only.

Designation	value parameters	value	unit
Light transmittance	TD65	34	Percent
Light transmittance	Te	31	Percent
Total energy transmittance	g	42	Percent
Thermal transmittance (upstand)	Uup	0.77	W/(m ² ·K)
Thermal transmittance (glazing)	Ut	1.1	W/(m ² ·K)
Thermal transmittance (unit)	Urc	1.02	W/(m ² ·K)
Resistance to static load (upwards)	UL	1000	Pa
Resistance to static load (downwards)	DL	1500	Pa
Reaction to fire class (dome unit)		B-s1, d0	
Reaction to fire class (SHEV-system)		E	
Resistance to sparks and heat		no	
Meltability of material		yes	
Reaction to fire class		B300 30	
Aerodynamic free area	Aa	0,81	m ²
Snow load	SL	2200	kN/m ²
Wind load	WL	1500	kN/m ²
Low ambient temperature class		T(-15)	
Weighted sound reduction index	Rw (C; Ctr)	20	dB
Fall through safe in closed state		for 1 year	

Dimensions

A	Order size - bottom clear width / length	120 / 120 cm
D	Upper clear width / length	100 / 100 cm
H	upstand height	30 cm

components

s	Dome shell	TOP-90-PLUS
k	Upstand	ISO THERM Upstand
n	SHEV system	FIREJET 165J SA 24V open/close
b	on site
