

VELUX is a supplier of building components and is liable only for its own description of the product characteristics. VELUX is not liable for the design, specifications or execution of an installation of VELUX products as carried out by third parties or as part of tender documentation. Please contact VELUX for information on the characteristics of the products. The purchaser is liable for the installation of the VELUX products and compliance with all applicable building, fire safety and other regulations. The modules, substructure, and assembly shall be designed, specified, and sized to meet the requirements of the specific construction project and all applicable architectural and engineering specifications and procedures, as well as the requirements and procedures of third-party contractors on the construction project.
